Summary: (machine translated)
Very short route with three consecutive waterfalls. Access is directly above the C28, the Borrigo waterfall.

Hydrology: (machine translated)
No emergency exit after the first rappel.

Always in the water.

Access: (machine translated)
From Nice, take the A8 highway towards Italy and exit at Menton. Drive down the exit and take the slip road at the bottom in the direction of Nice. Just before you rejoin the highway, take the right-hand road towards Ste-Agnès. If you always take the right-hand road at the next six junctions, you will reach the end point (dirt road). Park in such a way that you do not obstruct others and leave room for turning.

Approach: (machine translated)
Pass the barrier and reach the former quarry; cross the stream and then follow the yellow-marked path. At the GR51 marker (450 m), continue straight ahead (the ruins of La Virette on your left) until you come to a large scree slope. Then leave the path and follow this scree which leads to the stream (40 min).

Tour: (machine translated)
After about 10 minutes on foot you come to an unsecured, hollowed-out narrow passage C6, which leads to a pool (jump?). A short footpath leads to the intermediate step C12, the base of which can be reached on foot from the path. Continue by belaying the last 28 m high waterfall, which falls into a water basin.

Return: (machine translated)
From the foot of the C28 you can reach the vehicle in 2 minutes.
