Specialities:

Gear:

Summary: (machine translated)
Relatively dry rappel canyon. Often still has avalanche snow for a long time in spring.

Hydrology:

Access:

Approach:

Tour: (machine translated)
In the parts of the Tine d'Ardon, the avalanche debris tends to stay there all spring.

Return:

Coordinates:

Reports:

2026-05-21 | Bubtore | |🕮 |⚓ | 〰 Normal | 👎 Not done
There is still a lot of avalanche snow in the canyon, but the water level would be just perfect with the melting snow. But it will probably be another month before the avalanche debris is completely gone. (machine translated)
