Transport:	**Rock type:**	**Drainage area:** km²
Season: September - May	**Orientation:**	**Best Time:**
Rating: ☆ 0 ()	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:

Summary: (machine translated)
Canyon on the Sabar river, with short rappels, almost without approach or return. Better after heavy rains that clean the riverbed.

Hydrology:

Access: (machine translated)
We must reach Alfarnatejo and take the MA-4102, after passing the km4 we find two sharp bends (right and left) in the second comes out a track where we can put the car and park. This is the way out of the ravine.

Approach: (machine translated)
We go up the road to pk 4. and soon after we will see where to go down to the ravine. You can go further up and do a couple more rappels.

Tour: (machine translated)
A simple descent that is very interesting after rainfall. If it has not rained heavily it is better not to enter since in the surroundings, the farms dump their waste in this river.

Return: (machine translated)
We went out to the track where we parked.

Coordinates:
Canyon Start 36.9635 -4.2552
Canyon End 36.9635 -4.2549
