Season: January - December	**Orientation:**	**Best Time:**
Rating: ☆ 0 ()	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:

Summary: (machine translated)
In this case it is NOT A CANYON but an aquatic cave with a development of 130m, something unique in the world.
Being an AQUATIC CAVE we must leave the rappels installed to return by the same ropes.
Knowledge of caving is essential!

Hydrology:

Access: (machine translated)
On the A35 exit Vallada. We will arrive to the village and we will go to the Ermitas area where we will park. Next to the swimming pool.
If we have high car or 4×4 we can follow the road for almost a kilometer to a track that goes to the right by which we will go to the upper part of the basin. We will park there and the access would be almost immediate.

Approach: (machine translated)
Access to Font d'Arnau pool and Sumidor Cave
We will leave by the access to the pool and we will go to the right shortly before a path that leads us to a track behind the pool. Follow it southbound leaving on your right the exit of Font d'Arnau, soon pass the walls leaving them on the right and a zigzagging path goes up the mountainside, follow the path of the riverbed without throwing us to the path on the right that would lead us to Font d'Arnau to the entrance of the cave.

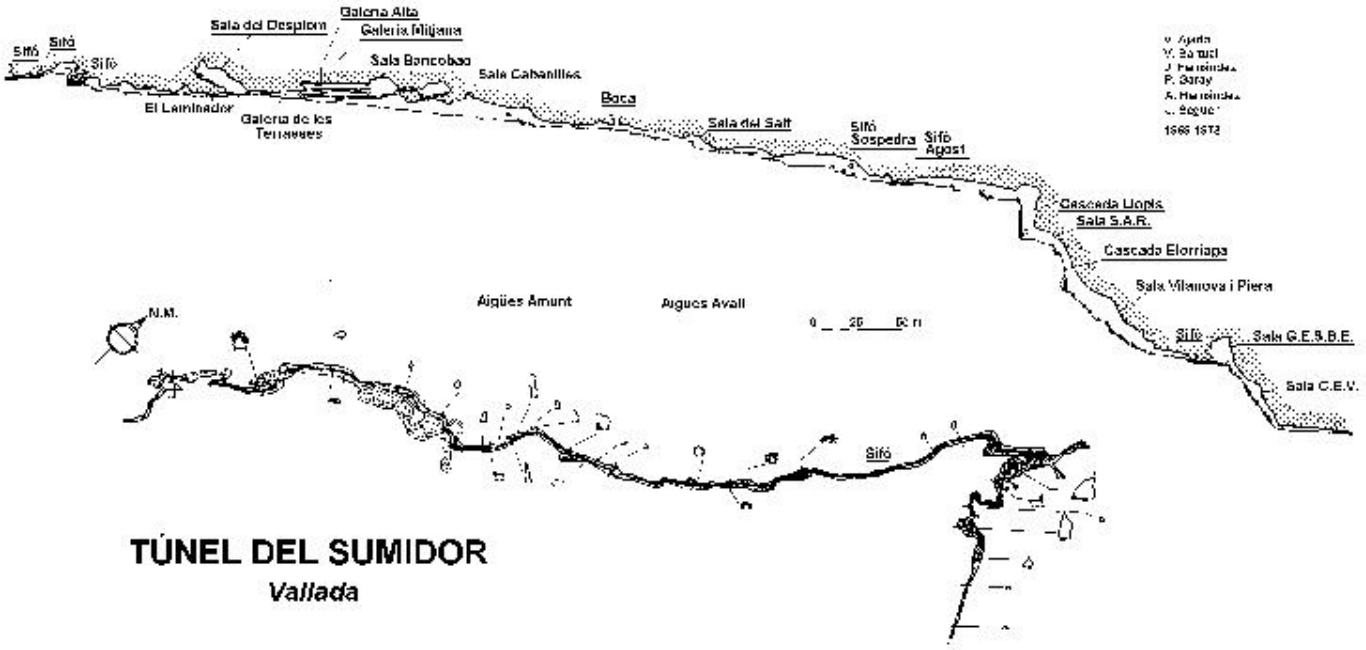

Tour: (machine translated)
A climb of several meters to enter the cavity. Then we have 500m of upper development drier and 800m with siphon included in the aquatic part.
As it is an AQUATIC CAVE, it is necessary to set up fixed rope installations to be able to return through them.

Return: (machine translated)
We will return by the same access path and then we will return by the same access path.
