Specialities:

Gear:

Summary: (machine translated)
Nice descent for the whole family if we catch it with water (spring and early summer) full of overhangs, pools, jumps, ... A couple of skills are equipped just in case.

Hydrology:

Access: (machine translated)
On the N260 between Boltaña and Fiscal. Before reaching the tunnels, at pk 447.4 we have a detour to the right to Ascaso.
The small zigzagging road climbs up the mountainside to this beautiful abandoned village. We will have to park on the side before entering the village.

Approach: (machine translated)
In the Plaza del Sol, just as you enter Ascaso, turn left following the PR-HU 185 trail to Morillo de Sampietro. A few meters further on it forks, the trail below is a return, we continue uphill to a stone bridge that crosses the ravine. After crossing it, we leave the main trail and go up the rock ramps parallel to the riverbed, going up until we see a pipe (about 300m), from here we will look for the way down to the riverbed.

Tour: (machine translated)
If we take it after rains we will be able to jump in several pools. In summer it dries out so we will have to be attentive to the time to do it.

Return: (machine translated)
We can leave by the bridge or behind it there are some pools and a little further on there is an ascending path on the right that leads us to the access fork.

Automatisch importiert von Descente-Canyon.com für Canyon Ascaso Canyon sans prétention mais très mignon avec une succession de petites vasques qui brillent d'un vert bleu sous le soleil. Les rappels sont équipés en mono point sur spit .... ce qui est suffisant pour sécuriser les petits rappels de 2 à 3 m (sauf sur la fin où la désescalade est de mise). Sortie en bas au niveau du second chemin permet d'ajouter 5 petits ressauts après le pont. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/22210/observations.html)
