Altitude entry: m	**Altitude exit:** m	**Delta Altitude:**
Canyon length: 700m	**Highest rapell:** 25m	**Amount rapells:** 6
Transport:	**Rock type:**	**Drainage area:** km²
Season: March - November	**Orientation:**	**Best Time:**
Rating: ☆ 0 ()	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:

Summary: (machine translated)
Beautiful canyon quite excavated where we will enjoy a geological wonder. This descent follows a natural fault in which different conglomerates are seen on each side. We also have a beautiful hiking path through these mountains to reach its head.
Enviable and wonderful environment for spring and autumn days, in summer in the afternoon very hot and in winter we can find the frozen waterfalls.
Possibility of combination of vehicles although the return by the track to Espluga is not too long.

Hydrology:

Access: (machine translated)
Bcos de la Terreta
By the N230 towards Pont de Suert
Access to Bcos de la Terreta
At p.k. 103, after the detour to Arén, we have the detour to the right to La Terreta. We will find the detour to the left and Els Massos de Tamurcia that we will leave behind, we will pass by Tamurcia where we have the sign of Espluga de la Serra at 5.2 km. We will follow the road until there where we will park.
If we want to combine vehicles we will follow the track with the return vehicle 1km until we cross the St Miquel stream and one more kilometer to our parking.

Approach: (machine translated)
Accesses to St Miquel, Corneli and Colliró bcos
By the path of ascent to the Pic de Llerás (there are many tracks of hiking trails in this area), we will reach the ridge where we will go south, to the coll del Serradell, about 500m later there is a path on the right that leads to the basin of St Miquel, we pass it, the next stream is the Corneli. After passing these streams, neighboring ravines that we can also descend, we will arrive at the path that brings us closer to Roca-espasa del Castellet, soon we have the stream on our right, we will go down this rocky area with great caution to the beginning of the ravine as such.

Tour: (machine translated)
See mole

Return: (machine translated)
We will follow the riverbed, which joins the Corneli stream, up to the trail
