Summary: (machine translated)
Short and open rappel canyon as access to Roudoule aval (II)

Hydrology:

Access: (machine translated)
From Nice up along the Var. At Puget-Theniers, turn right and head north on the D16 towards Le Croix sur Roudoule. Leave the turnoff to Puget-Rostang on the right and continue up until the road rises well above stream level and an old stone bridge appears next to/under a new suspension bridge. Continue on the orographic left side of the gorge and past the turnoff to La Croix sur Roudoule to the signpost with the "233" marker. Park the car here.

Approach: (machine translated)
On the bridge over the Roudoule and the GR 510 up towards the village of Amarines. At the 15th switchback (to the left) at a good 800 m above sea level, taking the path to the right - scanty red markings - we reach the stream at 830 m above sea level.

Tour: (machine translated)
The 6 rappels make sense as a run-in exercise for an immediately subsequent ascent of Roudoule II.

Return: (machine translated)
At the confluence with the Roudoule, cross the bridge to the car - unless you continue the tour through Roudoule II - Canyon (which should be the rule).
