Summary: (machine translated)
Raw data import from Ropewiki https://ropewiki.com/Turbewasser

Sunny but quite unsteady canyon, which has a nice part in schist at the beginning. Further down some open abseils in marble, and exits with gneiss just before reaching the Binna River. (machine translated)

Hydrology:

Access: (machine translated)
Drive in the Binntal up to the driving ban.

Approach: (machine translated)
The best way to get into the valley is by e-bike. And then only tackle the length of the canyon on foot.

Tour: (machine translated)
Unspectacular at the beginning, then a short passage halfway cut in and nicely polished. At the end, no longer black but white rock with a few higher open rappels.

Return: (machine translated)
The same as when you go there.

It's OK to do once, probably best combined with the Binna above the reservoir. (machine translated)
