Country: Österreich / Austria **Region:** Tirol **Subregion:** Bezirk Imst **Town:** Stams		
Difficulty: not as difficult	**Grading:** v3 a1 III	**Total time:** 1h55
Approachtime: 20min	**Tourtime:** 1h30	**Returntime:** 5min
Altitude entry: 790m	**Altitude exit:** 660m	**Delta Altitude:** 130m
Canyon length: 400m	**Highest rapell:** 20m	**Amount rapells:** 16
Transport: on Foot	**Rock type:**	**Drainage area:** 29.93km²
Season: May - October	**Orientation:**	**Best Time:**
Rating: ☆ 3.2 (10)	**Info:** ★ 2.6 (8)	**Belay:** ★ 1.8 (10)

Specialities:

Gear:

Summary: (machine translated)
In organizer circles called Krebsbach; this flows shortly above into the Lehnbach.pure rappel canyon, easy tour with little water, very sunny, therefore probably passable throughout the year, except when there is a lot of snow. Unfortunately, very heavily polluted and littered by waste / sewage from the heavily populated Mieminger Plateau.

Hydrology:

Access: (machine translated)
From the Inntal freeway take the Mötz exit onto the main road in the direction of Innsbruck, at Stams turn left after the last house and drive in the direction of "Wasserfall". At the end of the road, park your car in the parking lot in front of the highway underpass.

Approach: (machine translated)
Go through the underpass and over the suspension bridge to the northern bank of the Inn River and climb up on the hiking trail in the direction of Untermieming. After passing a chapel, immediately turn right at the edge of the meadow on a small path and continue along the edge of the forest down to the stream. (A little above on the left bank is the ruin of a mill).

Tour: (machine translated)
A total of 15 rappelling points, some very far outside the actual streambed, with chain anchors and some wire ropes to get to the belaystation. However, it is possible to also follow the course of the stream in the lower part. The final waterfall is rappelled in two stages (otherwise longer ropes are needed).Above water diversion to a power station.

Return: (machine translated)
Pass the power station on the right and take the footpath back to the suspension bridge and the car.

Coordinates:
Canyon Start 47.2889 10.9861
Canyon End 47.2874 10.9875
Parking Entry and Exit 47.2849 10.9849

Reports:

Stopped by Rosengarten on the way home; not much water—you can tell a major flood has passed through here; the anchor is fine. (machine translated)

2026-08-14 | Halder Tobi | ☆ ☆ ☆ ☆ |🕮 ★ ★ ★ |⚓ ★ ★ | 𝌆 Normal | 👍 Completed
Damaged supports were replaced, and deflectors were added to the second-to-last waterfall to accommodate higher water levels (machine translated)

2026-08-12 | Halder Tobi | ☆ ☆ ☆ ☆ |🕮 ★ ★ ★ |⚓ ★ ★ | 𝌆 Normal | 👍 Completed
There appears to have been severe flooding in the meantime; the stream is full of gravel and mud. Some belay stations are damaged; the final rappel down the waterfall is not possible because the belay station has been destroyed. This can be bypassed via the dry alternative route. (machine translated)

It's a pretty nice canyon—we started too high up. The chain anchors are OK so far. (machine translated)

2026-06-16 | Jackcachpot | ☆ ☆ ☆ |🕮 ★ |⚓ ★ | 𝌆 Low | 👍 Completed
It was a pretty nice canyon, though; we followed the waterline the whole way and even took a few detours along the way. We also set a few anchors. (machine translated)

Bridge open again. Rather higher water level, some anchorages are no longer in ideal condition but sufficient. (machine translated)

The suspension bridge over the Inn is closed indefinitely. This means that "official" access is only possible from above or by taking a long walk along the Inn ;(. Unfortunately, local residents continue to throw garbage into the stream. As a result, the garbage is omnipresent. (machine translated)

2025-05-25 | Felix Schmid | ☆ ☆ ☆ |🕮 ★ ★ ★ |⚓ ★ | 𝌆 Normal | 👍 Completed
Finally water again after last year! Partly only single hoes. The garbage was limited. Easy to walk on. (machine translated)

Today there was less garbage in the canyon than 2 years ago. Abseil point 10 was no longer really sensible to reach as it was 2m into the canyon, so too deep from above and too high from the canyon, someone had put 2 fairly thin trees across the canyon as a bridge, but it was too dangerous for me. You can go around to the right and rappel from a tree. Very nice today with the sun. (machine translated)

Canyon has changed a lot compared to 3 years ago, some stands would have to be renewed. Unfortunately a lot of garbage in the canyon :((machine translated)
