

Krebsbach

Lehnbach,Lehner Wasserfall

Create: 2023-03-09 20:52:43	Update: 2024-03-25 23:22:11	Print: 2026-01-30 08:01:42
Country: Österreich / Austria Region: Tirol Subregion: Bezirk Imst Town: Stams		
Difficulty: not as difficult	Grading: v3 a1 III	Total time: 1h55
Approachtime: 20min	Tourtime: 1h30	Returntime: 5min
Altitude entry: 790m	Altitude exit: 660m	Delta Altitude: 130m
Canyon length: 400m	Highest rappel: 20m	Amount rapells: 16
Transport: on Foot	Rock type:	Drainage area: 29.93km ²
Season: May - October	Orientation:	Best Time:
Rating: ★ 2.7 (4)	Info: ★ 2.7 (3)	Belay: ★ 1.7 (4)
Specialities:		
Gear:		
Summary: (machine translated) In organizer circles called Krebsbach; this flows shortly above into the Lehnbach.pure rappel canyon, easy tour with little water, very sunny, therefore probably passable throughout the year, except when there is a lot of snow. Unfortunately, very heavily polluted and littered by waste / sewage from the heavily populated Mieminger Plateau.		
Hydrology:		
Access: (machine translated) From the Inntal freeway take the Mötz exit onto the main road in the direction of Innsbruck, at Stams turn left after the last house and drive in the direction of "Wasserfall". At the end of the road, park your car in the parking lot in front of the highway underpass.		
Approach: (machine translated) Go through the underpass and over the suspension bridge to the northern bank of the Inn River and climb up on the hiking trail in the direction of Untermieming. After passing a chapel, immediately turn right at the edge of the meadow on a small path and continue along the edge of the forest down to the stream. (A little above on the left bank is the ruin of a mill).		
Tour: (machine translated) A total of 15 rappelling points, some very far outside the actual streambed, with chain anchors and some wire ropes to get to the belaystation. However, it is possible to also follow the course of the stream in the lower part. The final waterfall is rappelled in two stages (otherwise longer ropes are needed).Above water diversion to a power station.		
Return: (machine translated) Pass the power station on the right and take the footpath back to the suspension bridge and the car.		
Coordinates: Canyon Start 47.2889 10.9861 Canyon End 47.2874 10.9875 Parking Entry and Exit 47.2849 10.9849		

Reports:

2025-10-17 | Wido | ★★ | 🗺 | ⚓★★ | ⚓ Normal | 🤝 Completed

The suspension bridge over the Inn is closed indefinitely. This means that "official" access is only possible from above or by taking a long walk along the Inn ;(. Unfortunately, local residents continue to throw garbage into the stream. As a result, the garbage is omnipresent. (machine translated)

2025-05-25 | Felix | ★★★★ | 🗺★★★ | ⚓★ | ⚓ Normal | 🤝 Completed

Finally water again after last year! Partly only single hoes. The garbage was limited. Easy to walk on. (machine translated)

2025-04-30 | Ba | ★★★★ | 🗺★★★ | ⚓★★ | ⚓ Low | 🤝 Completed

Today there was less garbage in the canyon than 2 years ago. Abseil point 10 was no longer really sensible to reach as it was 2m into the canyon, so too deep from above and too high from the canyon, someone had put 2 fairly thin trees across the canyon as a bridge, but it was too dangerous for me. You can go around to the right and rappel from a tree. Very nice today with the sun. (machine translated)

2024-03-25 | Clarissa Linder | ★★ | 🗺 | ⚓ | ⚓ Normal | 🤝 Completed

Canyon has changed a lot compared to 3 years ago, some stands would have to be renewed. Unfortunately a lot of garbage in the canyon :((machine translated)
