

Torrente Valle di Bornico

Valle di Vione sup., Val di Piovere, Johanna Canyon, Sernifa, Vione 2

Create: 2023-03-09 20:49:53	Update: 2024-06-06 10:25:53	Print: 2025-01-16 05:01:53
Country: Italia / Italy Region: Lombardia Subregion: Brescia Town: Tignale		
Difficulty: a little difficult	Grading: v4 a2 II	Total time: 3h20
Approachtime: 15min	Tourtime: 3h	Returntime: 5min
Altitude entry: 600m	Altitude exit: 350m	Delta Altitude: 250m
Canyon length: m	Highest rapell: 45m	Amount rapells: 21
Transport: Car required	Rock type: limestone	drainage area: 13.00km ²
Season: May - September	Orientation: South	Best Time: 10-14 o clock
Rating: ★ 3.4 (3)	Info: ★ 2 (2)	Belay: ★ 3 (2)
Specialities:		
Gear: Ropes: 2x 50m/ 1x20m		
Summary: (machine translated) South-facing open canyon (forest canyon); partly very slippery limestone; 45m waterfall; several clear rappelling points; short access; very large catchment area! Registration at the tourist office village Tignalga regarding walk necessary (€2,- p/P... Name and tel. no. will be noted). Many places can be slid or jumped after careful examination.		
Hydrology:		
Access: (machine translated) From Torbole take the "SS45bis" through Riva and Limone, until "Prato della Fama". With the 2nd car you continue through the long tunnel and turn right towards Tignale. From here you follow the mountain road for about 5 km which then meets a bridge (exit Vione 1 or entry Vione 2). The car is parked a little below the bridge in a large bay. (or a little further down on the large parking lot, if you want to do the commercial a favor). With the other car up another 4.2 km until the road to Gardola branches off to the left. Go through Gordola and at the northern exit of the village turn left on Via Panoramica towards Aer (571 m a.s.l.), pass this village on the right until the exit of the tarred road (Via Castegneto). Here park the second vehicle.		
Approach: (machine translated) Follow the road until you can comfortably enter the stream at a bridge at about 600Hm. Alternatively, take the entry to the lower part of the Vione Superiore Valle di Bornico along trail 265 at the exit of Via Resem. Follow it until you reach a fork in the woods. If you want to enter at the half of Vione 1, follow the path on the left down to the stream. (Not recommended, because it is easier to go down the stream and the entry from the bridge is more time-saving).		

Tour: (machine translated)

Arrived at the stream, we immediately start with the first small abseils, which normally do not pose any major problems. The rappels are always easy to see and the pools unproblematic. Due to the open canyon you always have a safe feeling. However, this can change quickly in bad weather because of the large catchment area. Some pools can be jumped after checking the depth. In the middle part of Vione 1 you come to the hiking trail that leads across the stream (emergency exit). From here begins the 2nd part of the Vione 1. The descent leads over a sloping rock slab to the 20m rappel point (drill hooks for rope traverse available). Then a 15m rappel (possibly jump into deep pools). After short walking passages there is a slippery rock slab. Here you can downclimb through a small hole about 5m through the rocks. Next rappel about 10m. Li. long hollow with fixed ropes (beware very slippery!). Left approx. 15m rappel. Now comes the highest rappel point with 45m (right. good foothold) (left there is also a foothold, but not optimal rope guidance). Below the abseil point is a large pool. After that it goes over slippery parts to some small slides. It continues rather flat until the bridge (exit). After the bridge begins the Valle di Piovere (Vione 2).

Return: (machine translated)

Exit directly at the bridge (shuttle car) or in about 30 min walk to the parking entry.

Parking at Entry [45.7355 10.7010](#)

Reports:

2024-09-10 | Jason Walker | ★★★★★ | 📖★★ | ⚓★★★★ | 🌊 High | 🍏 Completed

You can divide the section into an upper and lower part, with the obvious wooden walking bridge being the mid way point. Above this, the maximum abseil is 20m, and there are many slides and jumps. It's a simple walk in and out, with ample parking. Below this, the maximum abseil is 50m. Commercial groups maintain the quality of anchors and handlines. The water is rarely clear, so it's good to check the jumps!! The gauge is at the main road, before driving up the broken dirt road. We completed the whole thing at this flow, but it could have taken 1-2cm of water over the concrete sides of the weir (at a good guess!!!)

2023-07-05 | Daniel Sturm | ★★★★★ | 📖★★ | ⚓★★★★ | 🌊 Low | 🍏 Completed

Very nice forest ditch. Lots of sliding and jumping, but VERY good check out. (machine translated)
