Summary: (machine translated) Rappel canyon in gray limestone with quartz veins, partly gloomy character.		
Hydrology:		
Access: (machine translated) We leave the A12 (Sargans-Chur) via the Bad Ragaz exit, drive through the center of Ragaz up to Pfäfers and into the Val Tamina. Passing the reservoir we reach the village of Vättis. Here we turn right and drive westwards into the Calfeisen valley and towards St. Martin to the Gigerwald reservoir. We drive over the top of the dam. From here on, the route is timed, so that one direction can only be taken in a 20-minute time window at a time. Continue along the southern shore of the lake through several tunnels (not suitable for large and wide vehicles!) to a parking lot at the exit of the road, still on the orographic right side of the Tamina reservoir tributary (1470m altitude). Here we park the car.		
Approach: (machine translated) We take the hiking trail away from the parking lot in the direction of the Sardona hut. Immediately we cross "our" stream and can thus judge the water flow. We walk about 300m and come to the foot of a meadow with a large boulder at the edge of the path (see http://www.descente-canyon.com/canyoning/photo/126683/_Quelques-reperes-pour-le-debut-de-la-marche-d-approche#liste) A few meters after this marked boulder we follow a faint track that serpentine up the meadow. About 60m higher, at the eastern edge of the meadow (see red entry in http://www.descente-canyon.com/canyoning/photo/126683/_Quelques-reperes-pour-le-debut-de-la-marche-d-approche#liste), a clearly recognizable path begins, which leads uphill in serpentine through the forest - partly wooden stairs. We follow this until we reach a tree with a sling (currently white Dyneema 5mm rope). Then traverse about 10m via traverse rope into the chute where it now has a ring anchor. From there rappel 50m into the canyon.		
Tour: (machine translated) A total of 12-15 rappel. We start with a C8, followed by a C35. After some smaller steps and a passage of walking and descending we come to the narrow and attractive part. After a C19 followed by a C40 and a double step (C36), there are again smaller rappels until the exit of the canyon.		
Return: (machine translated) Descend on the wide gravel bed and out to the right to the parking lot.

Automatisch importiert von Descente-Canyon.com für Canyon Parlitobel it is possible to do the canyon, but many of the bolts are in poor condition. All single bolts. Not as nice as in 2018 (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/22450/observations.html>)

Automatisch importiert von Schlucht.ch für Canyon Parlitobel, Wasserstand: "Niedrig" Verankerungen: "Ok" Wenig Wasser daher gut machbar. Zustieg wie von Holzi beschrieben - mit etwas suchen - gut gefunden. Erster Stand ca. 10 Meter unterhalb des Baumes mit der Bandschlinge. Alle Stände vorhanden, zwar zum Teil rostig aber ok.

Little water so easily doable. Access as described by Holzi - with a little searching - easy to find. First belay about 10 meters below the tree with the sling (see photo). All belays available, partly rusty but ok. (machine translated)

After heavy rains from Thu evening to Friday night at high water level walked. Great optics, super grippy rock, no mobile phone reception! At the entrance a hook was set instead of abseiling on the tree. (machine translated)
