Ropes: 1x20m

Summary: (machine translated)
Only small steps, but interesting moments. A canyon to "hang on" if there is still time after another tour.

Hydrology:

Access: (machine translated)
from Chambery see google maps section under links

Approach: (machine translated)
Take the forest path as an extension of the road where we parked. We come across the stream and follow it to the first gulch (entry).

Tour: (machine translated)
Many small steps that we can rappel or downclimb. Towards the exit we pass under a clamping block. See also photo album and video under Links.

Return: (machine translated)
The most difficult part of the tour. We look for a route where we can turn left up the slope. At the top, after emerging from the bushes, we kept left along the edge of the forest up to the road. But maybe there is a better option in the forest.

Automatisch importiert von Descente-Canyon.com für Canyon Roche Fougère Jour de pluie donc eau un peu boueuse.... Mais le retour d'une bonne pluie est appréciable. Les embacles se sont bien déplacées. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2873/observations.html)
