Altitude entry: m	**Altitude exit:** m	**Delta Altitude:**
Canyon length: 200m	**Highest rapell:** 40m	**Amount rapells:** 7
Transport:	**Rock type:**	**Drainage area:** km²
Season: January - December	**Orientation:**	**Best Time:**
Rating: ☆ 0 ()	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:

Summary: (machine translated)
Under the Roca de Guixers we find this little frequented descent, very vertical and fun. Not suitable for inexperienced people!

Hydrology:

Access: (machine translated)
We must be located on the LV4241 next to Sant Llorenç de Morunys.
In the p.k. 34.9, just on the bridge there is a small road that goes up to La Vilella, we will go along it until the end, leaving the quarry on the right and park near the farmhouse (we will be next to the GR).
With the access car, if we have it, we return to the LV4241 towards Berga. At p.k. 39.5 we have the pont de Valls, turn left to Valls and La Corriu. We will go along this beautiful road for 5kms until the detour (left Sant Martí de la Corriu and right Santuari de Puig-aguilar), we will take the road on the left. We will pass by the sanctuary and continue along the road without deviating until it becomes a track, soon a turn of almost 180 degrees to the right and a very lost track in front. Park here or go along the track if we can 100m to the source of the torrent.

Approach: (machine translated)
If we have two cars access is almost immediate, from the upper track is to follow the stream.
If we only have one car we must take from the farmhouse the GR trail that will take us up the side of Platformiu and leads to the Roca de Guixers, arriving at the place outlined in the stream we will leave the GR.

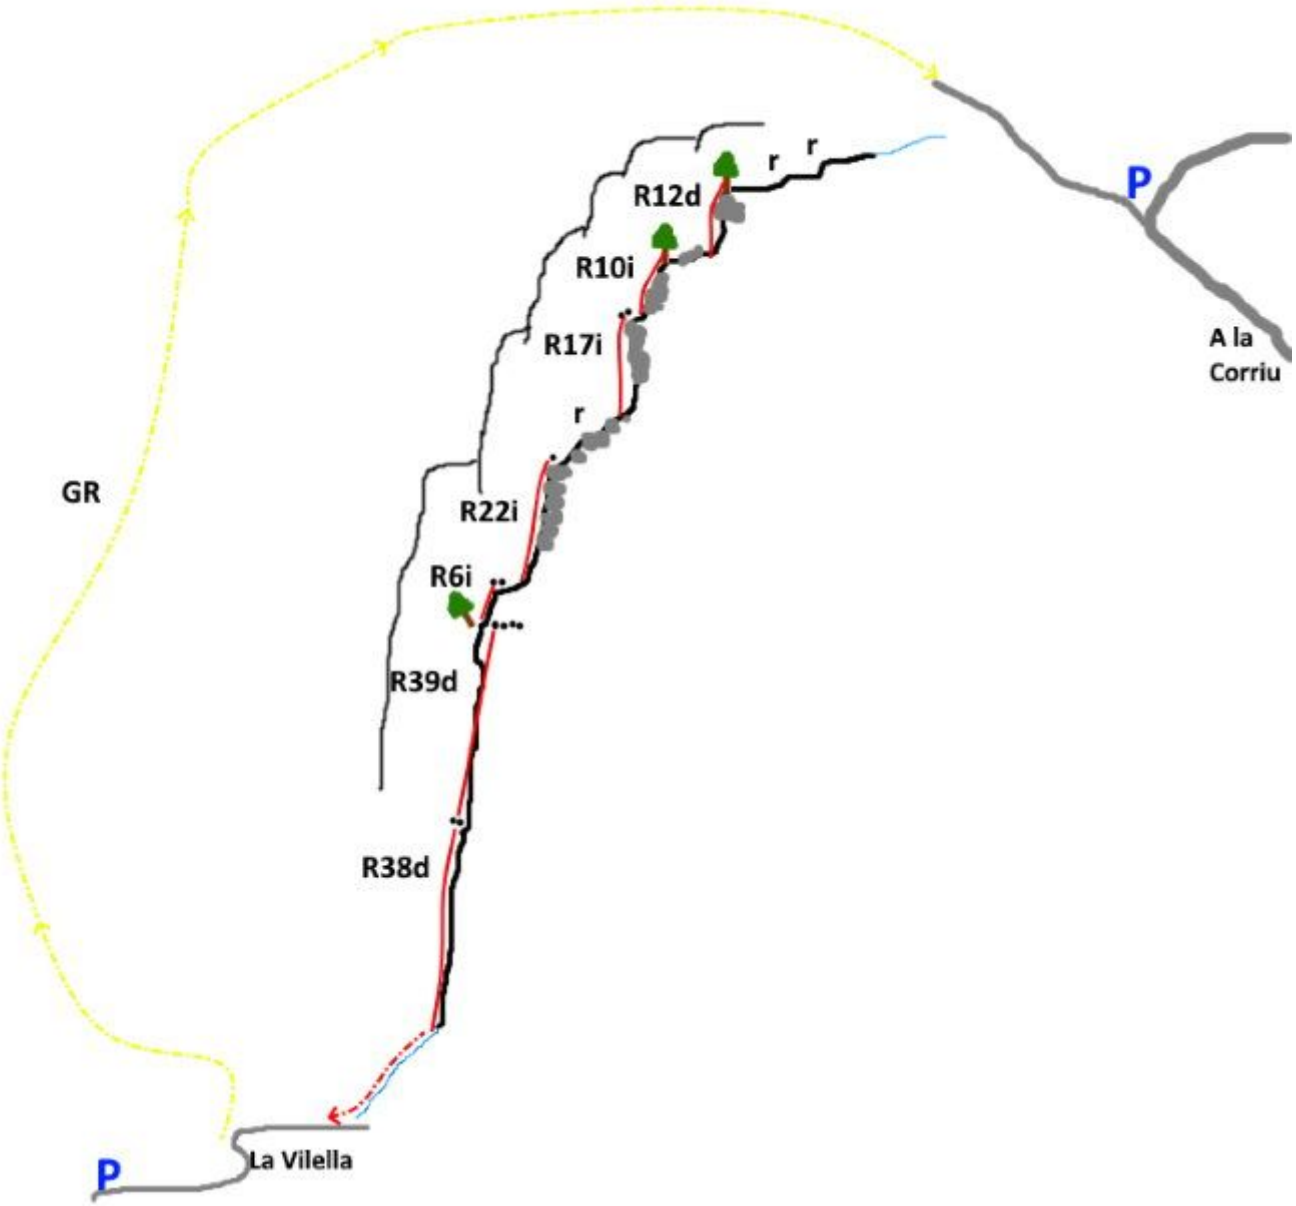

Tour: (machine translated)
A first part of approach to the great vertical, then part of the vertical more closed to reach the balcony, already open of the 3 final rappels of almost 90m.

Return: (machine translated)
At the bottom we follow the stream until we find a track that we take to the right to go down to the farmhouse of La Vilella.
