Specialities:		
Gear:		
Summary: (machine translated) Actually quite attractive rappel canyon.		
Hydrology:		
Access: (machine translated) Either from Brig via Visp down the Rhône or from Martigny via Sion/Sitten up the Rhône on the "9" to Susten/Turtmann, then change to the orographic. right bank of the Rhône and park the car for the exit in the leisure area at the canyon exit. Here you can also check the water flow and spend the night (also with the camper) (for the approach see also the Google aerial photos in the photo gallery).\n\nWith a second car we then drive Rhône downhill via Susten to Leuk on the orographic. right bank of the Rhône and further uphill in eastern direction (Bratsch, Erschmatt). At the bridge over the Feschelbach we park the second car (see conversion on Google aerial photo in the photo gallery).		
Approach: (machine translated) From the bridge we climb (2-3 smaller rappel) on clear tracks down to the streambed.\n\nShould we have only 1 car, we can ascend to the bridge on the orographic right side of the stream (50 min).		
Tour: (machine translated) Many smaller rappels, see topographic views		
Return: (machine translated) Out of the canyon directly to the car.		
Coordinates: Canyon Start 46.3136 7.6749 Canyon End 46.3081 7.6712

A deeply carved canyon with impressive rock formations and clear water. There were 1–2 pools you could jump into. Near the bridge, we found a few bones and car parts left over from past “cleanup operations.” The facilities are all top-notch! (machine translated)

Glued anker points and numbered. Top equiped! Water was perfectly clear, bit cold but always a nice canyon to do. We walked up on the orographic right side of the canyon, there is now a little track until Untere Rotafen.

The water level was low, but the water was clean, clear, and fresh. It was really fun. It was only a little slippery. The few jumps are doable, and the pools have enough depth. All the anchors are in good condition. (machine translated)
