Summary: (machine translated)
Cold clean water; some small slides and rappels; exit possible almost everywhere; nice pools; short tour.

Hydrology:

Access: (machine translated)
From Locarno drive first ri. Maggia valley --> follow the road until the village Broglio --> directly at the end of the village there is a sign with the inscription Fusio 10km + bus stop Somprei where on the right a small road branches off --> drive down this road, cross the bridge --> further turn left and follow the gravel road past the stone houses until the next bridge at about 700Hm --> park here (exit).

Approach: (machine translated)
Climb up the already visible hiking trail next to the stream --> you can also take a shortcut and climb directly --> after a short time there is a wooden bridge --> you cross this --> over the large stone slabs you reach a tree where you can rappel about 15m into the stream (entry below the waterfall).

Tour: (machine translated)
This short but very beautiful tour is well suited for beginners --> after you have rappelled from the tree you go only briefly to the next 2. small rappel --> the following beautifully washed out pools invite you to slide --> other places can be mostly rappelled (but there are pitons for downclimbing) --> almost throughout the course you have the possibility to get off --> caution is advised at the last rappel point C15 --> here is an overhang + sharp edge --> then you could get off left or downclimb the last meters.

Return: (machine translated)

Low water level. All the anchors are in good shape. We did the entire route. The upper part is beautiful; the lower part isn't really worth it right now because there's not enough water, though the water is nice and clear and fresh. (machine translated)

A short but fun canyon with incredible water. You can enjoy a variety of jumps, ranging from easy and relaxed ones to more challenging jumps for those looking for a bit more excitement. (machine translated)

Done upper and lower, anchors everything in order with cristal clear and fresh water. Right after the 50m pitch been hit by the hail and the heavy rain that covered the high and mid Maggia valley in the afternoon, we speed up cause close the the more open area of lower Tome but in a group of ten, once safe after the toboggan right under the approach bridge the canyon become impracticable (see picture for reference levels at the start of the day and after); rain up to 60mm/h sustained for 30min.
