Country: Italia / Italy **Region:** Piemonte **Subregion:** Torino **Town:** Novalesa		
Difficulty: a little difficult	**Grading:** v4 a3 III	**Total time:** 3h15
Approachtime: 1h5	**Tourtime:** 2h	**Returntime:** 10min
Altitude entry: 1060m	**Altitude exit:** 870m	**Delta Altitude:** 190m
Canyon length: m	**Highest rapell:** 54m	**Amount rapells:** 10
Transport: on Foot	**Rock type:**	**Drainage area:** km²
Season: August - October	**Orientation:** West	**Best Time:**
Rating: ☆ 3.7 (3)	**Info:** ★ 2 (1)	**Belay:** ★ 1.5 (2)

Specialities:

Gear:
Ropes: 2x 55m

Summary: (machine translated)
Rappel canyon with a great closing vertical

Hydrology:

Access: (machine translated)
like Claretto: Coming from Turin, Frejus we leave the A32 by the exit "Susa Est", cross the town of Susa and then take the SP210 to Novalesa. Once there, without crossing the Rio Claretto, we take "Via Roma" in a southeasterly direction to Sant'Anna. Soon after the last houses of Novalesa we come to the bridge over the Rio Marderello. Just before the bridge we park our car on the left.\n\nIf we are coming from the direction of Briancon, we leave the A32 at the exit "Susa Ovest" and get directly onto the SP210, which leads us to Novalesa (see aerial photos for the approach).

Approach: (machine translated)
Shuttle with Romeo Claretto:
Romeo Claretto lives in Novalese, has the key to the gate, and knows the access routes very well. He’s happy to drive you up to the entry point in his Land Rover (about 15 euros per person).
+33 6 26 12 12 18 (WhatsApp in French or Italian).

As per Claretto’s instructions: We take the path that leads from the car to the clearly visible final waterfall of the Claretto. We reach the stream, cross it, and climb steeply up a path on the orographic right bank. We come to a forest trail, follow it, and then see the small diversion channel on the right, slightly below us (possible emergency exit), and arrive at an alpine hut (“La mojùn de paréin Steu”). We now take the path down to the right into the canyon (signpost “Tordupi”) and quickly reach the bridge over the Rio Claretto. After the bridge, turn right and head slightly downhill to a small hut. Continuing along the trail in a southeasterly direction, we reach a via ferrata, where we can descend into the Marderello streambed.

Tour: (machine translated)
10 rappels, mostly higher, to the imposing final waterfall.

Return: (machine translated)
Downhill in the streambed until we can exit to the left onto the approach trail. Then on the direct path to the car.

Coordinates:
Canyon Start 45.1911 7.0304
Canyon End 45.1910 7.0241
Parking Entry and Exit 45.1881 7.0190

Automatisch importiert von Descente-Canyon.com für Canyon Marderello (aval) Enchainé avec Marderello amont.Équipement correct. Au premier rappel, trouvé en RG en arbre avec un relais dessus ne pas descendre dans le lit même si il y a un relais difficile d'accès. Relais sont souvent hors actif ce qui peux être un peu dommage. Enchaînement final magnifique. Merci leVal de Suza pour cette géologie incroyable (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2632/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Marderello (aval) Équipement sensiblement pareil que Claretto. Des monos points. Pas toujours évident à voir, pas toujours en hyper bon état mais ça marche pour la descente. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2632/observations.html)

The inferiore was better equipped and needed less attention, but many anchors are on steel bolts. In a foreseeable future these will have to be changed. It was nice to be back with Romeo. Having done a few possible combos (also Claretto + Marderello in 1 day) i'd recommend Claretto as grand finale on day 2.
