Season: March - August	**Orientation:**	**Best Time:**
Rating: ☆ 3 (1)	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:

Summary: (machine translated)
Nice waterfall that is usually with a thread, since the water is dammed a little further up for the hydroelectric plant that we have next to the road. Short, very vertical, with good views and the hermitage next door, a good option. Great caution with the possible water releases!
Descent only for people with experience and that is/was subject to prohibition for being inside the National Park.

Hydrology:

Access: (machine translated)
On the N625 towards Oseja de Sajambre.
At p.k. 125,3 next to the hydroelectric power station we leave the return car.
With the access car we continue to Oseja de Sajambre, just arriving we have the detour to the left to go up to Soto. We will go through here up to the viewpoint just before the bridge, with the riverbed next to it and the views from the top of the waterfall.

Approach: (machine translated)
From the lookout point it is immediate

Tour: (machine translated)
Fantastic waterfall although usually with a trickle.

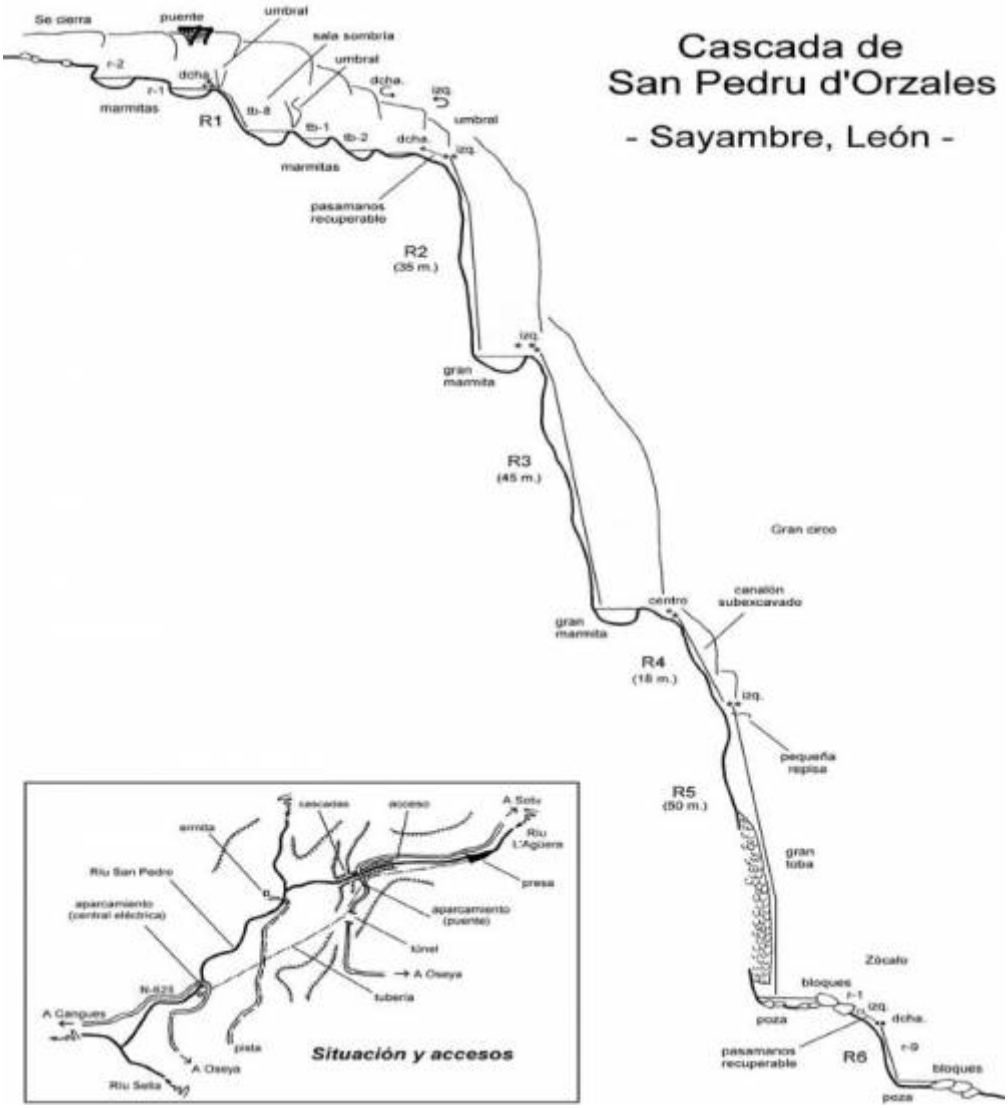

Return: (machine translated)
We will leave the riverbed and continue along the shore to the track, on the right we have the chapel and on the left leads us to the road. If we want to save some way, at the height of the pipe and the power line, we follow it to the power plant.

Coordinates:
Canyon Start 43.1520 -5.0501
