Specialities:

Gear:

Summary: (machine translated)
A different way to access the Peonera Inferior and practice rappelling or teach a beginner because they are short and easy to execute rappels.
It can be done all year round, the problem is in the Peonera and its flow.

Hydrology:

Access: (machine translated)
On the highway from Huesca to Barbastro, take exit 77 towards Abiego/Alquézar. Arriving at Abiego turn towards Bierge on the A1227.
Parking Peonera Inferior
Bierge towards Rodellar on the HU341, before pk 6 we have a right turn and on the left the Peonera parking lot.

Approach: (machine translated)
Access to Loma Güerga and San Juan
From the parking we will leave by the track that goes to the north parallel to the road. After 500m there is a track to the left along the hill that separates the ravines of San Juan and Loma Güerga. We will go down here for almost a kilometer until we see a little-traveled track on the left that descends diagonally towards the ravine. If we pass it we will have another access ahead but it is less evident and worse downhill.

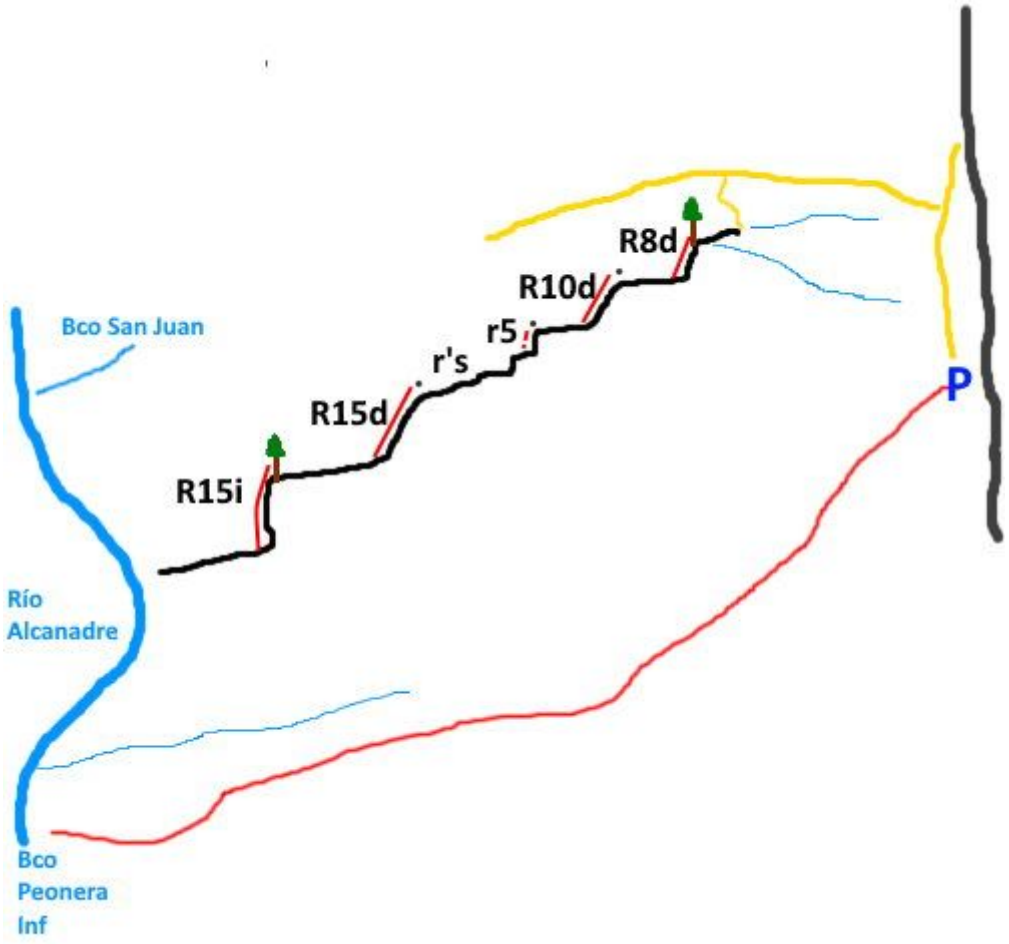

Tour: (machine translated)
A first part along the dry riverbed with plenty of vegetation that does not contribute anything but when we approach the gorga of the Peonera, our ravine will close a little and fall on it in a series of small rappels and very simple skills in which to teach rappelling and then continue with the aquapark of the Peonera.

Return: (machine translated)
We will continue along the Peonera to its normal access and return through here. We also have the option of doing Peonera...
