Season:	**Orientation:**	**Best Time:**
Rating: ☆ 3.3 (1)	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:

Summary: (machine translated)
Rappel canyon that later mutates into a hiking canyon.

Hydrology:

Access: (machine translated)
From Ponte Leccia on the T30 for 4km in the direction of Calvi, then turn right onto the D105. 4.4km after this turnoff we come to the bridge over the Vadone. Immediately after the bridge we park our car for the exit.\nWith the second car we drive up to Canavaggia via Costaroda. In front of the church we turn left at an acute angle onto a dirt road. After 270m the track forks; we stay on the right. 900m further we pass a cattle barn (on the left of the track). The track makes a 90° right turn and 140m further we park our car. Depending on the condition of the car, we could also take the dirt road on the left to the exit.

Approach: (machine translated)
At the exit of the aforementioned dirt road there is an almost circular area where we start our approach towards WSW. We pass the heights "802" and "748" on the IGN map.we come to the Ruisseau Stazzatellu, Here the path branches. On the right we go to the Carcheto entry. If you don't plan to do the Carcheto-Vadone integral climb, go down to the left and you will reach the Genoa Bridge, which marks the exit of the Carcheto and the beginning of the Vadone. Entry just above the bridge.

Tour: (machine translated)
We expect 10-12 rappel and then longer runs towards the exit. After the C40 and the inflow from the left (Rau de Stazzatello), after the next two rappels (C15 and C10) a siphon (D10) awaits us, which can be bypassed on the right bank. A C15 follows, then a first longer run. About 15 min. after the last rappel (C10) we look for an exit to the right on a path at about 265m height - stream course describes a right turn here.

Return: (machine translated)
It leads us down to the road bridge where the lower car is. So we do not find this exit, we continue in the streambed to the bridge.

Coordinates:
Canyon Start 42.4953 9.2353
Canyon End 42.4816 9.2277

Automatisch importiert von Descente-Canyon.com für Canyon Vadone Parking au niveau de la tombe située en haut de la piste bétonnée qui monte au dessus de Canavaggia. Impossible d'aller plus loin avec notre voiture basse. Nous avons effectué l'enchaînement Carcheto Vadone décrit dans le topo de F. Jordan ce qui évite la navette et la partie finale de Vadone qui est horrible. Approche en 1 h 30. Prendre ABSOLUMENT un pantalon long, sinon, c'est l'enfer. Départ de Carcheto à l'altitude 730. C'est très beau. Des rappels sympas avec de belles marmites où l'on peut parfois sauter. On arrive au pont génois et on enchaine avec Vadone. Sortie RD au sommet de la C40. Au total, 2 h de descente. Grosse galère pour remonter jusqu'au chemin pavé. Là aussi, le pantalon est très appréciable. Retour jusqu'à la voiture en 1 h 40. Au total, ça fait beaucoup de marche pour assez peu de canyon. On a nettement préféré la partie Carcheto. Si on revient, on ne fera que cette partie. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2342/observations.html)
