Season: June - August	**Orientation:**	**Best Time:**
Rating: ☆ 0 ()	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:

Summary: (machine translated)
Beautiful alpine canyon, very short, well formed, with good facilities and very pleasant access and returns.
Given if situation we can park at the viewpoint of the rock of Quer and make the ferrata or the ravine of Grau.

Hydrology:

Access: (machine translated)
Situated in Andorra La Vella we take the CG2 towards Envalira.
Just before reaching Canillo we have the Quer rock on the left, with the Racons ferrata and the Grau ravine. When entering the village we will take the first traffic circle on the left to go up to the viewpoint (same road as the Ordino pass).
We will park in the parking lot of the Mirador

Approach: (machine translated)
We head north along the Montaup valley towards the Coll de Arenes.
Almost from the first moment we will see the crack to descend and the path on the orographic left, at the height of the water catchment, which goes over it to a footbridge over the stream, moment of access to the ravine.

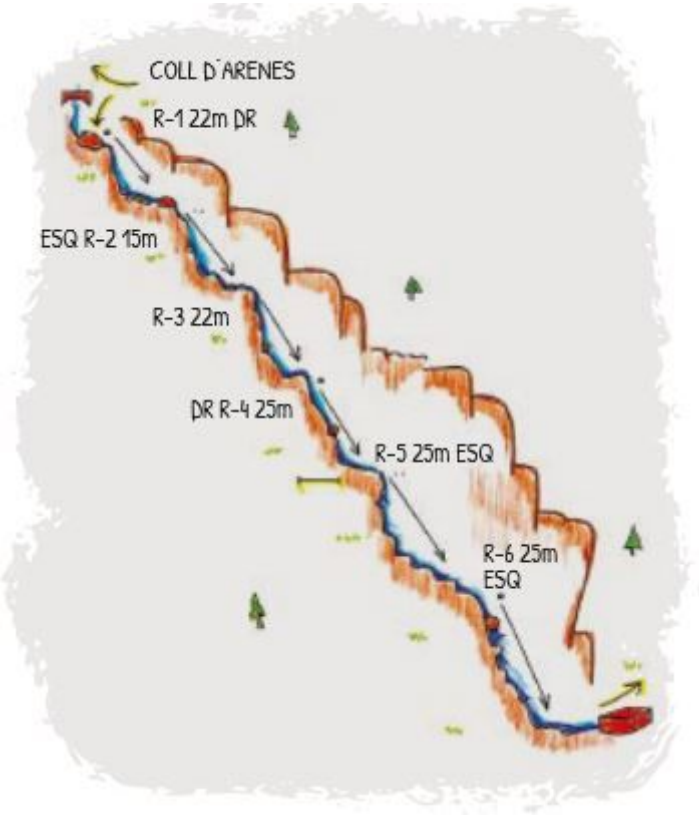

Tour: (machine translated)
Without respite, 6 almost consecutive rappels along this beautiful crevasse, well equipped and with very cold water! Caution with the recovery of the ropes

Return: (machine translated)
When we reach the catchment, we turn left onto the trail.

Coordinates:
Canyon Start 42.5735 1.5860
Canyon End 42.5733 1.5865
