Country: France **Region:** Nouvelle-Aquitaine **Subregion:** Pyrénées-Atlantiques **Town:** Sainte-Engrâce		
Difficulty: a little difficult	**Grading:** v4 a2 II	**Total time:** 2h33
Approachtime: 15min	**Tourtime:** 2h15	**Returntime:** 3min
Altitude entry: 780m	**Altitude exit:** 605m	**Delta Altitude:** 175m
Canyon length: 450m	**Highest rapell:** 33m	**Amount rapells:** 5
Transport:	**Rock type:**	**Drainage area:** km²
Season: March - November	**Orientation:**	**Best Time:**
Rating: ☆ 2.9 (1)	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:

Summary: (machine translated)
Canyon in the area of Sainte-Engrâce with two parts divided by the road, where we can park the access vehicle. With water all year round and, like the whole area, very slippery, it is an entertaining and simple canyon in its lower part; and with a large waterfall of almost 60m in the upper part. Caution with the flows since some waterfalls are in small narrows.
Perfect to combine with Harzubia or any other in this area.
Check possible prohibitions of the upper part. The lower part does not have any type of regulation.

Hydrology:

Access: (machine translated)
We must reach Sainte-Engrâce.
From the French side by the D113.
From the Spanish side via Isaba we go up the pass of Piedra de S. Martin and turn left.
Descending from the pass, we will have to take the return car to Sainte-Engrâce, here we turn left (towards the church and Gorgas de Ehujarre) and go down until the track ends at a bridge over the river.
If we have an access vehicle, one kilometer before arriving at Sainte-Engrâce there are two closed curves over our stream, with a place to park.

Approach: (machine translated)
From the access vehicle it is immediate.
From the return vehicle we could go along the road or, short but harder option, climb a path that runs parallel to the river to turn left and climb up to the road almost.
The access to the upper part is made by the track that leaves 100m below the place where we left the access vehicle, this track makes two loops and then heads NE towards the headwaters of the stream, it becomes a path and soon we will see how we leave the great waterfall below us, a few meters later we can descend to the riverbed.

Tour: (machine translated)
Upper part with two small rappels to approach the large waterfall that is fractionated, the fractionation is on the right but hard to find, after this we reach the road.
Lower part, from the road, 9 rappels of up to 18m in small narrow but very nice where the water of this small ravine can get very strong in the rainy season (caution).
Very slippery in all its course, with water all the year round and some headwaters in the inferior part a little compromised.

Return: (machine translated)
After the last waterfall there is a path (the same as the access path) on the right where we can go down to the bridge.

Coordinates:
Canyon Start 42.9964 -0.7988
Canyon End 42.9936 -0.8013
