Summary: (machine translated)
After two rappels at the entry hike on sintered streambed.

Hydrology:

Access: (machine translated)
From Ainsa we take the N-260 in the direction of Broto (WNW), after about 6.7 km we pass through Boltaña and after 8.2 km (from Ainsa, town center) we turn left onto the A-1604 in the direction of Campodarbe. After 1.9 km we come - before the hairpin right turn - to an open space on the left of the road, where we park our first car. Below is an unwooded slope, over which we climb back up to the car at the end of the tour.\n\nThen we continue another 3.6 km with the second car (or walk) and park our car on the shoulder. From here you can see the waterfalls at the entry.

Approach: (machine translated)
From the road just a few meters down the slope to the entry point directly above the first two rappels.

Tour: (machine translated)
3 rappels, 2 higher at the beginning, 1 at the exit of the tour. Otherwise hiking canyon with some slides and possible jumps. See photos and videos

Return: (machine translated)
After the road bridges still 1 rappel follows. After that, it still goes down the creek until we can easily get out on the left. Across the free slope, it then goes up to the road and the lower car.
