Canyon length: 380m	**Highest rapell:** 35m	**Amount rapells:** 6
Transport:	**Rock type:**	**Drainage area:** km²
Season: March - November	**Orientation:**	**Best Time:**
Rating: ☆ 2.5 (1)	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:

Summary: (machine translated)
Also known as Riu de Cerdanyola and Torrent de la Font del Castell, it is a short but very fun descent.

Hydrology:

Access: (machine translated)
By the C16 we will be located in Guardiola de Bergedà, from the same C16 we have the detour to Sant Julià de Cerdanyola, on this road before the kilometer we have a sharp bend to the left with a sign to "Les Nou Fonts". Here we leave the car to return.
If we have two cars we continue up the road, we make the curves linked and pass a viewpoint to reach the church of Santa Maria de les Esposes. After the guardrail we can park the access car.

Approach: (machine translated)
With a car we will walk the two kilometers up the road to the church.
From the church there is a path that takes us to the headwaters just above the 35m waterfall.

Tour: (machine translated)
Very short descent with 5-6 rappels. The 12m can be extended another 3 to lower the ledge and not make more facilities but will give us problems recovering. Almost all the rappels have prepared facilities to make a recoverable handrail for safe access to the top of the cliff.

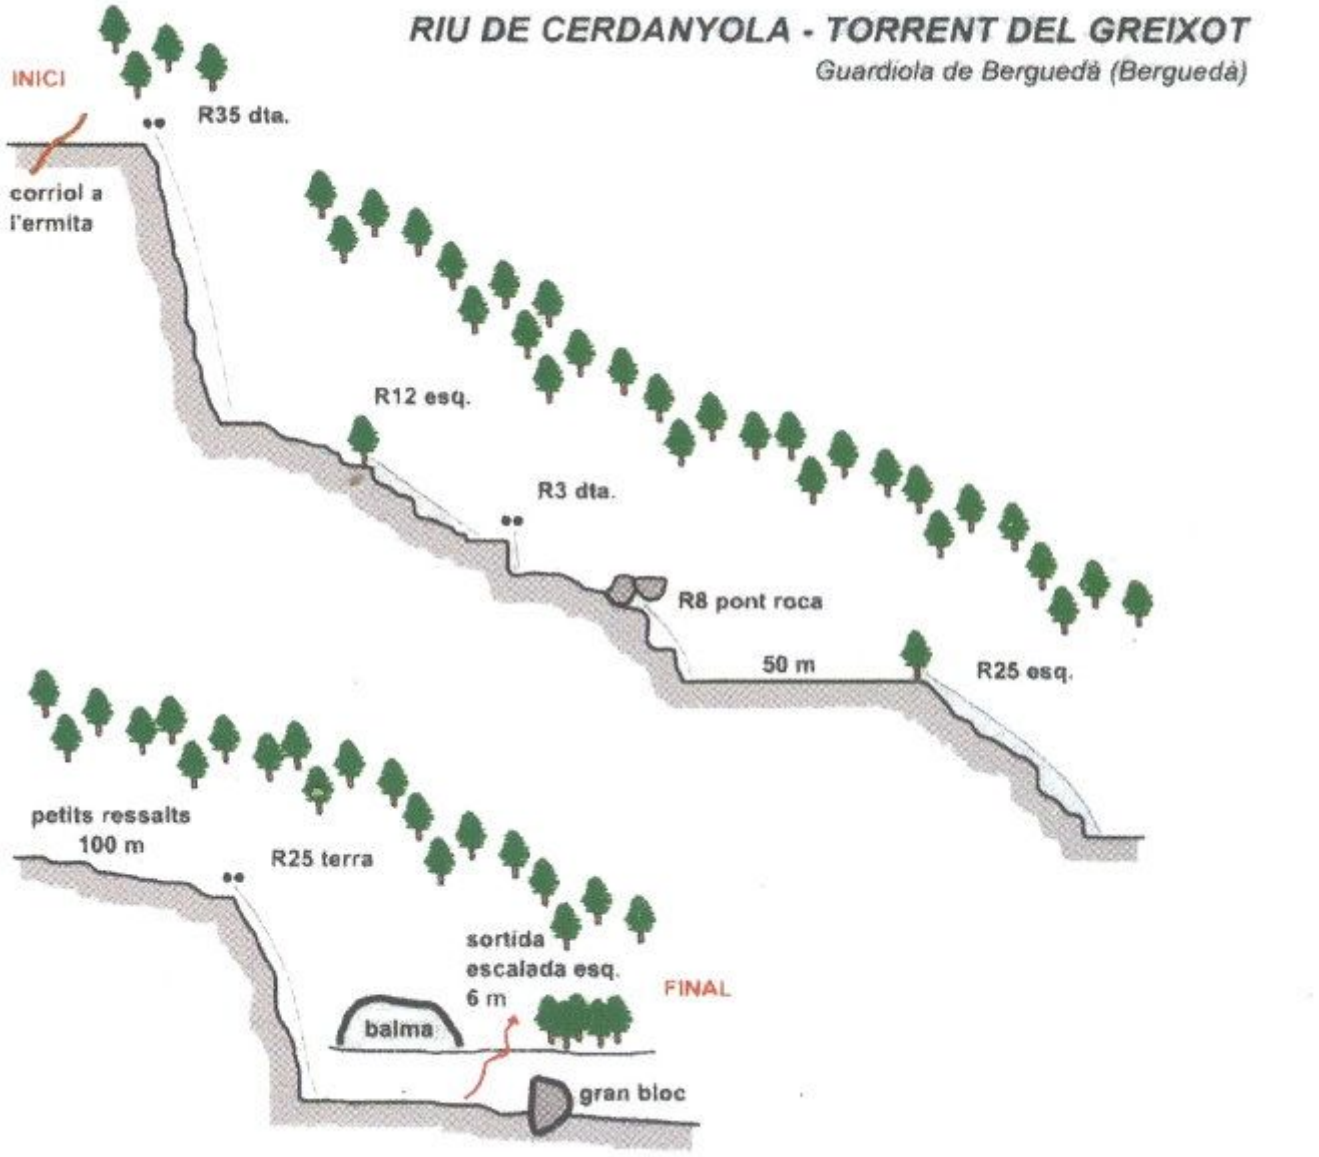

Return: (machine translated)
After the last rappel we have on the left a mud ramp with large roots to climb to the Nou Fonts and from there to the path, by that path we go down to the parking area if we have combined cars.

Coordinates:
Canyon Start 42.2260 1.8865
Parking at Entry 42.2266 1.8860
Parking at Exit 42.2278 1.8811
