Country: Italia / Italy Region: Trentino-Alto Adige Subregion: Trento / Provincia autonoma di Trento Town: Ampolla Pass		
Difficulty: a little difficult	Grading: v4 a3 IV	Total time: 5h6
Approachtime: 1min	Tourtime: 5h	Returntime: 5min
Altitude entry: 1125m	Altitude exit: 740m	Delta Altitude: 385m
Canyon length: 2300m	Highest rapell: 30m	Amount rapells: 26
Transport: Car optional	Rock type: limestone	drainage area: 10.30km²
Season: June - September	Orientation: Southeast	Best Time:
Rating: ★ 3.9 (12)	Info: ★ 2.8 (9)	Belay: ★ 2.8 (10)
Specialities:		
Gear: Ropes: 2x40m/ 1x20m		
Summary: (machine translated) Highly recommended; many rappels and some jumps possible; long, slippery canyon with cold crystal clear water; check water level behind the inn before the tour; many rappels in the water; several deep pools; large clamping block in the lower third, only with kl. groups, emergency exit in the middle of the canyon (right), most sun at noon.		
Hydrology:		
Access: (machine translated) From Torbole --> Riva --> Storo --> through long tunnel towards Albola mountain pass --> past Lago di Ledro and small villages --> straight on --> past Laghetto D'Ampola --> then turn left (Tremalzo) --> park your transfer vehicle at the Ampola Inn --> from here drive up the long mountain road and past the church of S. Croce church --> after about 1.5 km, at km 6.5 (closed from Nov. 1 to April 30), take the narrow road on the right (small group of houses) down to the bridge (entry 1125 m).		
Approach: (machine translated) Right at the bridge (with shuttle car) or without shuttle car on foot in about 1h15min walk up the old path behind the Ampola inn to the bridge (entry).		
Tour: (machine translated) From the bridge to the 1st rappel point it is about 20min. in the streambed (slippery stones) --> now follow immediately the first rappel which continue continuously --> numerous places you can jump (accurate assessment) or. rappel --> in between there are walking passages --> many rappels are outside of the waterway and can only be reached by long exposed crossings (mostly fixed rope) --> a striking point is a place with a huge clamping block under which you have to rope through --> after that there are about 5-6 rappels (some also jumpable) --> the last rappel point (12m) can also be jumped --> from this point on it is only about small flat slides and a short piece in the stream along.		
Return: (machine translated) The exit on the right leads through the loose forest floor to the open meadow and the inn (shuttle car) (740Hm).		
Coordinates: Canyon Start 45.8504 10.6603 Canyon End 45.8635 10.6448 Parking at Entry 45.8503 10.6604 Parking at Exit 45.8642 10.6458

Automatisch importiert von Descente-Canyon.com für Canyon Nero Fait avec navette, 20min de marche en rivière avant d'arriver au premier rappel. De l'équipement à foison, le plus souvent relai RG et RD. Certains sont neufs et normés, d'autres sont très fatigués, il faut bien choisir. Sorti à l' échappatoire RD après la cascade n°7 (sentier des guides, très confortable, en descente), on s'est pris un orage énorme non prévu. Le risque de crue n'est pas énorme dans ce canyon, mais le risque de chute de pierres est bien réel ! (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2606/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Nero Encore une magnifique découverte que ce Rio Nero en ce troisième jour de Raduno 2024...Le débit ce jour était des plus agréable, eau quelque peu fraîche qui contrastait avec la température de l'air...Les rappels (25) s'enchaînent sans temps mort pour notre plus grand plaisir, agrémenté de quelques sauts histoire de varier les plaisirs...Descendu en 4h00 à 6 coéquipiers sans courir, la partie finale où l'on croise des groupes avec BE est la plus belle...Avons fait la navette de véhicules (7,2km) ça permet de gagner en fatigue... (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2606/observations.html>)

The beginning is really very boring, next time we would also take the previously described parking lot in the last hairpin bend. Otherwise a very nice canyon with some great rappels. At abseil point 21, do not take the damaged anchor on the right-hand side, there is a new chain anchor just outside on the left-hand side. Abseil point 20 is very narrow and leads directly through the water (see picture), certainly uncomfortable if there is a lot of water, but it can also be done dry. If there is more water, think about a top rope here! In the lower part, shortly after a signposted exit, there is an abseil point that supposedly leads through a blockage. The rope will definitely get caught here when you pull it off! However, somewhat hidden, as it is black, there is a fixed rope on the left after a few meters, which allows you to rappel very nicely in the dry. (machine translated)
