| Summary: (machine translated) Varied forest canyon | | |
| Hydrology: | | |
| Access: (machine translated) From the Annecy - Chambéry highway (A 41/E 712), take the Aix-les-Bains Nord/ Gresy-sur-Aix exit onto the D 911 and head (initially northeast) towards Lescheraines, Chatelard for 20 km, then (before Lescheraines) turn left onto the D 912 towards Col de Leschaux. After 1.3 km, turn right onto the D61a to Bellecombe-en-Bauges (another 3 km) and from here head east up to Mont-Devant. Go straight on to the houses and then turn right slightly downhill to the bridge over the Bellecombe. Park your car here. If you have a second vehicle (not necessary), go back to the houses, then up to the right, finally along the Bellecombe up to a clear widening of the road, shortly after crossing a stream coming from the left. Park your 2nd vehicle here (or in the parking lot right next to it). | | |
| Approach: (machine translated) A few meters north of the bridge, where the (lower) vehicle is parked, a path begins that climbs steeply, meets a path that we take to the right and come to the tarred road. Follow it until you reach the widening mentioned above. From here we go directly into the stream. | | |
| Tour: (machine translated) Varied rappel sequence, 2 grotto passages possible. Slippery. Useful in conjunction with the nearby Pont du Diable (same stream). | | |
| Return: (machine translated) Before the bridge go out to the left. | | |
