Automatisch importiert von Descente-Canyon.com für Canyon Cannobino Cela nous a pris environ 5 heures, en entrant par le pont près de Socraggio. Eau toujours claire, très peu de déchets. De très longues périodes de natation. Les étendues de gorges sont peu nombreuses et discontinues. Toutes les difficultés liées à l'eau sont facilement contournées. Nous avons utilisé la corde (10 mètres) sur AN (il y a aussi une ancienne ancre artificielle) uniquement pour faciliter une descente dans l'eau lors du dernier petit saut (3 mètres) avant le lac final (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/22040/observations.html)
