Specialities:

Gear:
Ropes: 1x30m

Summary: (machine translated)
The Vacca is not extremely narrow cut but still very rewarding with a few beautiful individual places. Certainly one of the highlights of Corsica.

Hydrology:

Access: (machine translated)
From Solenzara drive about 30 min on the now well built road to Bavella. After the mountain pass Bocca di Larone park in the second 180 degree bend.

Approach: (machine translated)
The path goes through the Maccia first slightly uphill and winds around the mountain keeping slightly left. After 10 min it goes downhill. On a horizontal stretch of path you can see a tafoni rock jutting out of the maccia. Here the path divides. To the right, the path becomes steeper and steeper through the woods to the river.

Tour: (machine translated)
In case of impending thunderstorm in any case do not enter!!Material: buoyant rope, 30m rope.Dreamlike, strongly cut and very short (1.5 km)canyon, starting with two easy jumps. First abseil point with 8-10m or to be mastered with jump. Shortly after, a waterfall curtain, which is about 10m wide. Here you have to look where you jump. Heavy people come up on the bottom!!! Stones can be seen from above. After that some swimming passages. Slippery passages (4-5m high) follow, which are better to rappel if you are doing the tour for the first time. A swimming passage ends at a waterfall, which is about 12m high. Some jump from there, for me it was too risky because the lake is quite shallow. Finally a 3 meter jump, which ends in a 3m wide and 250m long canyon, which you have to swim through completely. After that there are only 2 easy 4m jumps to do.

Return: (machine translated)
After a large stone on the right, almost completely surrounded by water, there are several paths on the left, steeply uphill, which all unite afterwards. Directive always upwards. Access and descent are almost more dangerous than the tour.

Coordinates:
Canyon Start 41.8201 9.2747
Parking Entry and Exit 41.8249 9.2723
Canyon End 41.8191 9.2816

Automatisch importiert von Descente-Canyon.com für Canyon Vacca Mon canyon préféré de Corse jusqu'à maintenant, superbe cadre, superbes vasques, et très beaux obstacles même s'ils ne sont pas très hauts (comme le rideau). En plus, vu personne a cette saison. La remontée du chemin de retour doit d'ailleurs être rude en plein été! (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2300/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Vacca Débit correct plus, l'orage d'il y a 2 jours a bien gonflé le ruisseau. Tres bonnes Conditions pour la descente. Attention a la petite cascade apres C12, il faut sauter obligatoirement car si on tire le rappel dans le bouillon, on ne parvient pas a sortir en nageant. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2300/observations.html)
