<b>Specialities:</b>		
<b>Gear:</b> Ropes: 1x30m		
<b>Summary:</b> (machine translated) The Vacca is not extremely narrow cut but still very rewarding with a few beautiful individual places. Certainly one of the highlights of Corsica.		
<b>Hydrology:</b>		
<b>Access:</b> (machine translated) From Solenzara drive about 30 min on the now well built road to Bavella. After the mountain pass Bocca di Larone park in the second 180 degree bend.		
<b>Approach:</b> (machine translated) The path goes through the Maccia first slightly uphill and winds around the mountain keeping slightly left. After 10 min it goes downhill. On a horizontal stretch of path you can see a tafoni rock jutting out of the maccia. Here the path divides. To the right, the path becomes steeper and steeper through the woods to the river.		
<b>Tour:</b> (machine translated) In case of impending thunderstorm in any case do not enter!!Material: buoyant rope, 30m rope.Dreamlike, strongly cut and very short (1.5 km)canyon, starting with two easy jumps. First abseil point with 8-10m or to be mastered with jump. Shortly after, a waterfall curtain, which is about 10m wide. Here you have to look where you jump. Heavy people come up on the bottom!!! Stones can be seen from above. After that some swimming passages. Slippery passages (4-5m high) follow, which are better to rappel if you are doing the tour for the first time. A swimming passage ends at a waterfall, which is about 12m high. Some jump from there, for me it was too risky because the lake is quite shallow. Finally a 3 meter jump, which ends in a 3m wide and 250m long canyon, which you have to swim through completely. After that there are only 2 easy 4m jumps to do.		
<b>Return:</b> (machine translated) After a large stone on the right, almost completely surrounded by water, there are several paths on the left, steeply uphill, which all unite afterwards. Directive always upwards. Access and descent are almost more dangerous than the tour.		
<b>Coordinates:</b> Canyon Start <a href="#">41.8201 9.2747</a> Parking Entry and Exit <a href="#">41.8249 9.2723</a> Canyon End <a href="#">41.8191 9.2816</a>

Automatisch importiert von Descente-Canyon.com für Canyon Vacca DCSuper belle ambiance après les obstacles ne sont pas forcément majeurs par rapport aux autres du secteur mais l'ambiance est folle (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2300/observations.html>)

2025-10-17 | System User | |📖|📌|🌊 Normal |👍 Completed

Automatisch importiert von Descente-Canyon.com für Canyon Vacca Mythique. Parfait pour profitez d'un canyon à Bavella sans baigneur !Équipement RAS, relais à chaque vertical pouvant offrir un refus de sauter. Réalisez en 4h30 a deux sans se presser (ce serait dommage!). De l'épingle 30min d'approche et une heure de retour.Pour notre part, nous avons sautez a la C2, C8, Rideau (S5m), C1, Tete de fourmis (S5m), et siphon grotte (S3m). Il y a un dernier saut très stylé avant la sortie (S3m). Avant le dernier gros biefs, de la rive gauche il y a une petite marmite creusé dans une fissure, un saut précis mais jolie !La corde bleue accroché au relais du bas RD est vieillissante, elle doit servir au pro du coin. Elle mérite d'être changé ! (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2300/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Vacca Beau canyon, facile. Glissant. En revanche la marche d'approche et surtout retour sont moins évidente. Bien lire les recommandations dans la description pour la sortie avec le rocher borgne (voir les photos). Il y a un cairn 50 mètres avant le rocher, ne pas sortir a ce premier cairn même si il y a un début de traces et bien sortir après le rocher. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2300/observations.html>)

2025-07-18 | System User | |📖|📌|🌊 Normal |👍 Completed

Automatisch importiert von Descente-Canyon.com für Canyon Vacca Sans doute le plus beau canyon Corse. La nouvelle marche d'approche rallonge la durée de la descente. Nous étions seuls dans le canyon, des pros étaient derrière nous. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2300/observations.html>)
