Specialities:

Gear:

Summary: (machine translated)
Spectacular for its start with the R40 in cantilever, has almost new facilities (2019) and always goes dry. Avoid summer, too hot.

Hydrology:

Access: (machine translated)
By the C59 we arrive to Sant Feliu de Codines, once there we cross the village until the detour to Sant Miquel del Fai by the BV1485. We park there

Approach: (machine translated)
From the parking place we continue straight ahead in search of the GR5 that goes on the other side of the river by which we came with the car. Once we find it we follow it up to the first torrent (about 15min) and go down to the first rappel.

Tour: (machine translated)
Two cantilevered rappels to start with, the first 40m and the second 20m. A quieter section and we finish with another cantilevered rappel. Beware of friction!

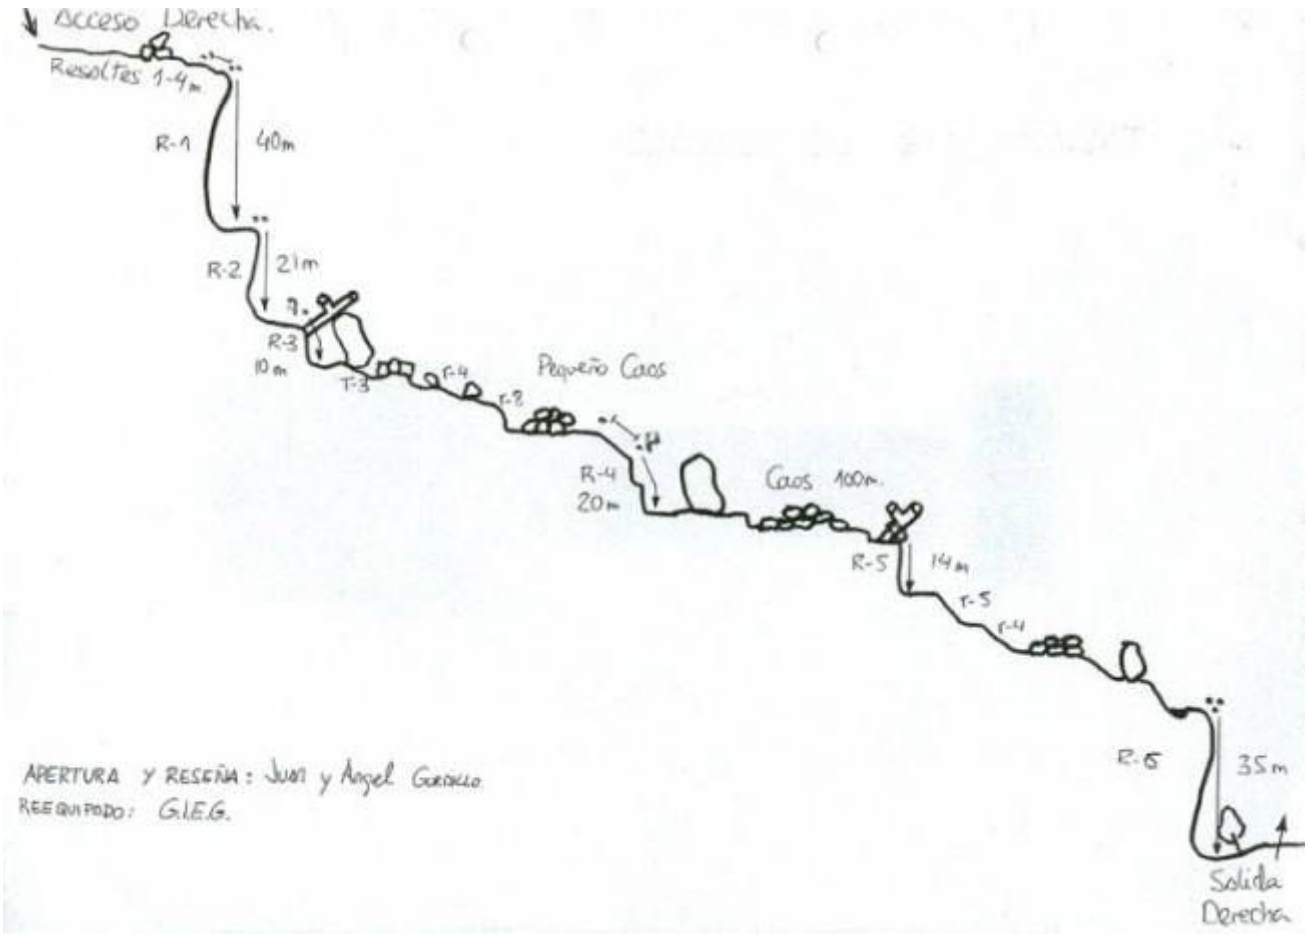

Return: (machine translated)
At the end of the rappel there is a small path to the right under the walls that leads to the path that goes up to the sanctuary. With a little bit of eye, you can't miss it.
