Summary:
A nice little addition to the classic Trodo.

Hydrology:

Access:

Approach:
Trodo has been done from the very top, but only becomes interesting from a height of 780m. So it's best to walk up the path west of the canyon and then look for tracks down the 40-50 degree slope.

Tour:
The interesting part is just from 780m, there are 2 parts with about 4 pitches each; some smaller jumps also possible.

Return:
Superiore only makes sense if you also do the inferiore, or otherwise you can combine Sassaltorio and Superiore.

Coordinates:
Canyon Start 46.1274 8.8852
Parking at Exit 46.1529 8.8926
Canyon End 46.1320 8.8916
Parking at Entry 46.1376 8.9041

Entered after exploration of Sassaltorio branch, after conjunction the flow doubles or more and during descent many tributaries increase even more; flow quite high after heavy rain during the week. Quite long walk before arriving to the first 4 pitches. Anchors very minimal/explorative.
