C4, R2, R2, C20, C5, R3, C5, C20, C12, C6, R3, R3, R3,
Emergency exit possible at almost any time.
Take a lamp with you for tunnels in the access.

A torrent with terrifying floods, but which dries out EXTREMELY quickly. It is very difficult to walk it with water. It is 100% karst-fed and comes out of a cave upstream. The water is then very cold. This cave probably serves as an "equalization shaft" for an as yet unknown underground circuit...

Fun fact: It is impossible to do both tours (Ruine and Malvaux) on the same day and in the water, hence the local saying: Si Ruine en eau, Raft dans Malvaux...

Return:

Automatisch importiert von Descente-Canyon.com für Canyon Ruine Canyon réalisé de nuit a la frontale. ensemble de rappel assez facile. Aucune gestion des frottements nécessaire. La sortie du canyon se fait par la rive droite juste avant d'arriver au pied du pont. Le chemin est légèrement pentu et glissant (a cause des feuilles) (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2202/observations.html)

2026-05-05 | System User | |🕮 |⚓ | ≋ Dry | 👍 Completed
Automatisch importiert von Descente-Canyon.com für Canyon Ruine AN du premier 20 m sous le belvédère pas trouvé ainsi que les amarrages pour la C6 finale. Inexistant? Certains amarrages meriteraient une petite revision mais ça passe bien. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2202/observations.html)
