Country: España / Spain **Region:** Valenciana, Comunidad / Comunitat Valenciana **Subregion:** Castellón
Town:

Difficulty: easy	**Grading:** v2 a1 II	**Total time:** 1h40
Approachtime: 10min	**Tourtime:** 1h	**Returntime:** 30min
Altitude entry: m	**Altitude exit:** m	**Delta Altitude:**
Canyon length: 600m	**Highest rapell:** 7m	**Amount rapells:** 1
Transport:	**Rock type:**	**Drainage area:** km²
Season: January - December	**Orientation:**	**Best Time:**
Rating: ☆ 0 ()	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:

Summary: (machine translated)
Nice canyon, fattened, short and generally dry. Only interesting if it is found with water

Hydrology:

Access: (machine translated)
We have to be located in San Vicente de Piedrahita on the CV196. On the CV20 until almost the Arenoso reservoir, at p.k. 51.4 next to Montanejos, there is a road on the right that crosses a bridge CV195 to Zucaina. 51.4 next to Montanejos, there is a road on the right that crosses a bridge CV195 to Zucaina. We will go along this road almost until km 8, here there is a detour to the left to San Vicente.
Once in the village we will have to get into the street behind the Red Cross, following this street becomes a road that heads north. After a kilometer we have a couple of sharp bends (left-right) to go down to the stream bed and a few meters before a track that goes off to the left. We will go down the track for about 600m with the Garranchosa ravine on our left, we leave it behind and after a kilometer the track ends and we park.

Approach: (machine translated)
By a small path heading west, very obvious because it is simply to go down to the riverbed.

Tour: (machine translated)
Fattened, very well formed, but without great difficulties and generally without water.

Return: (machine translated)
When the gorges open, we will turn left onto a track, along which we will go about 400m to a path on the left that goes up the slope. Following it north, we will arrive at the rest of a track that leaves us where we have parked.
