Summary: (machine translated)
By toponymy it is really the Revente river, but we have only found bibliography with the other name. It is a beautiful ravine in a wonderful environment of beeches. Located near the Calera area, we will have the opportunity to enjoy both these ravines and this and its neighbor Fuente Provedo.
Gully divided into two parts, if we do the lower one will force us to make a combination of cars to save us a great walk to the head car. Indispensable to do it after rains to enjoy its beautiful waterfalls and if it is in autumn much better to glimpse the beech forests in its splendor.
In our opinion, the best option is to do only the upper part and combine it with Provedo.

Hydrology:

Access: (machine translated)
We are located in the port of Tornos on N629
Location of Provedo and Rovente bcos.
At p.k. 52,8, going down the Cantabrian side, in the right curve there is a track on the left. We get into it, after 300m we have a crossing, we go to the left, we make those left curves and park the access car before another track that comes out on our right. If we only do the upper part we do not need a combination of cars.
If we want to do the lower part, with the return car we will have to follow the national road 400m more until the next right curve, where the CA662 to Fresnedo comes out on the left. Just at the entrance of this village we have a small road on the left, between green meadows we will enjoy this road, which goes halfway up the slope, until a sharp right curve where it crosses the river Revente, we park here.

Approach: (machine translated)
Access to the Provedo and Rovente mills
We continue walking along the track that goes up to the upper track, access to the mills. Once on the upper track, we continue about 500m to a hut, just before the left curve, we turn right onto a path that goes to the hut of Rovente, we follow the riverbed until the first difficulties. If we continue to the next riverbed we arrive at Provedo.

Tour: (machine translated)
Open, through a beautiful beech forest. When you reach the track, the first part ends and the second part begins.

Return: (machine translated)
After the last rappel we will arrive at the remains of an old track in disuse. We will go to the right and continue to the track where we parked.
If we are going to do the lower part, we will leave this track behind and continue the descent. When you reach the confluence with the stream Trapía continue along the bed about 100m more to a track, take this track on the left downhill to the road. Right there we will have parked.
