Rating: ☆ 3.9 (27)	**Info:** ★ 2.8 (7)	**Belay:** ★ 2.8 (24)

Specialities:

Gear:
Ropes: 2x30m

Summary: (machine translated)
Short but attractive canyon because of its narrowness and relatively high water flow.

Hydrology:

Access: (machine translated)
From St. Johann/Tyrol 7 km north on the 312 to Erpfendorf. Turn left there and continue for 2 km to Wohlmuting. Turn left before the bridge over the Taxabach, then right over the small bridge, immediately left again, keeping left again at the farm and up to the start of the ascent. Park your car here on the right.
Coming from Kössen (Upper Bavaria) in the direction of St. Johann, you will reach Wohlmuting after 12 km.

Approach: (machine translated)
Either on the forest road or better on an inconspicuous path on the orographic left side of the stream, then left over the wooden bridge - with informative view into the canyons - and after another 50m right down into the streambed above the bedload barrier.

Tour: (machine translated)
A tyrolienne is temporarily installed on the 1st rappel C22. But 2x30m ropes are necessary!
After 15m intermediate stand orographic right (with fixed handrail, recommended), then still R7. The "slide" before the 2nd rappel can be bypassed to the left or to the right at the top. The next step can be done ortographic left C10 (exposed chain anchor) or ortographic right via rope traverse C20 (chain anchor). T2 at the exit of the canyon is to be checked with regard to the necessary pool depth. orographic. left bolt available or body anchor. 15m after T2 flood protection area.

Return: (machine translated)
At the canyon exit, take the path on the left up to the car.

Coordinates:
Canyon Start 47.5978 12.4631
Canyon End 47.5989 12.4648
Parking Entry and Exit 47.5994 12.4650
Waterlevel Checkpoint 47.5989 12.4647

The first waterfall is dry, and there's only a little spring water coming out of the wall now. But everything's still okay. The water is crystal clear. (machine translated)

Everything's fine so far, but the first waterfall is still dry. (machine translated)

Thanks to the rain, it's a little wetter, but still relatively dry. All the pools are jumpable, though you should still be a little careful at the last two. (machine translated)

2026-08-16 | Joey CIA | ☆ ☆ ☆ ½ |🕮 |⚓ ★ ★ ★ | ≋ Low | 👍 Completed
Historically low water level. There hasn't been this little water in 20 years. The first waterfall is completely dry. Otherwise, everything's fine and still jumpable, thanks to the spring at the entry that's still providing water. (machine translated)

Since other streams in BGL were too full, we headed to Taxaklamm (thanks @JoeyCIA for the water level info). It’s a relatively short gorge that you can get through in about 1.5 hours, even with multiple jumps. All the belay stations are equipped with chain anchors. Fixed ropes are all made of steel cable. Super secure thanks to all the metal. All the jumps and slides were doable. 1–2 pools, though some were only 2 m deep. Better than expected, so we went straight for a second run thanks to the minimal, short access□□ (machine translated)

A little more water after the rain. Everything is great. Watch out for cut bushes in the lower area. Something is falling in every day at the moment because the top has been cut. Otherwise everything is ok. (machine translated)

Automatisch importiert von Descente-Canyon.com für Canyon Taxabach Very nice short canyon. Ideal for example for winter, if you want to try cold canyon -> It's short enough for you to enjoy it without taking any risks. A fun canyon for beginners in the summer. looks nice from above. The wooden bridge is closed but you can enter the stream a bit further down the road.

Everything is a mountain pass. Good water level, all jumps possible. Stands OK! Be quiet on the exit, as the local residents are annoyed by the noise. (machine translated)
