Hydrology:

Access: (machine translated)
To reach the village of Boixols we must go to Coll de Nargo, where we take the L-511 towards Isona.
Once in the village of Boixols we will have two options.
1ª- With a single vehicle we will park in Boixols.
2ª- With two vehicles we will pass the village of Boixols and we will descend by a track that leaves to the left approximately 1 km. until arriving at a bridge that crosses the ravine, where we will leave the first vehicle. With the second vehicle we will return to the village of Boixols where we will park and follow the indications of the first option to reach the ravine.

Approach: (machine translated)
We go down through the village and turn the first street to the left along a track until we find a wooden sign on the right indicating a path that leads to the ravine (10min.).

Tour: (machine translated)
Simple descent of short rappels and the occasional jump. The rappels will not exceed 5 meters, until you reach the longest rappel of the descent of 12 meters, which we can descend on the left overcoming a handrail installed with chains, or on the right if the flow allows it, descending through the middle of the waterfall. Once we overcome this rappel we will access to the most beautiful part of the descent, a few short narrows with beautiful play of light. From here we only have to reach the last rappel under the medieval bridge. Be careful if you jump this last one, do not jump to the left.

Return: (machine translated)
1 Vehicle:
We will have to go up a road from the bridge to boixols.
2 Vehicles:
We will take a path to the left following the course of the river to the car.

Automatisch importiert von Descente-Canyon.com für Canyon Boixols Je suis allé au départ, un peu d'eau coule mais le sentier est barré par de la rubalise des agents forestiers. Dans les environs, panneaux qui interdisent le passage en raison du risque d'incendie. Je ne sais pas si c’est pour cette raison qu’il y a la rubalise, ce n’est pas clairement écrit à cet endroit précis mais j’ai renoncé.
