Transport:	**Rock type:**	**Drainage area:** km²
Season: March - November	**Orientation:**	**Best Time:**
Rating: ☆ 3.1 (1)	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:

Summary: (machine translated)
Unfrequented canyon with a lot of trunks in the riverbed. Lots of small rappels and some jumps make this a very entertaining descent for a morning.

Hydrology:

Access: (machine translated)
From Tarbes we head towards Lourdes on the N21. Then continue towards Gavarnie-Gedre on the D821. Continue towards Gavarnie-Gedre on the D921. Before arriving at Chèze we will see some ruins and a track on the left, we take it and go up it for about 100m and park.

Approach: (machine translated)
From the ruins we continue along the track and further along the path that continues it. Gradually we will see the ravine on the left until the road will approach the stream until we reach almost 800m where we will enter the gorge.

Tour: (machine translated)
Logging in a forest environment

Return: (machine translated)
The descent ends after passing the road, we will go left through a meadow to a track that leads us up to the road. Soon we will arrive at the ruins

Coordinates:
Canyon Start 42.9227 -0.0314
Canyon End 42.9199 -0.0410
Unknown Parking 42.9175 -0.0395

Automatisch importiert von Descente-Canyon.com für Canyon Plaa Chemin très bien balisé en suivant les flèches oranges Le débit d eau permettait d approcher sans soucis les relais . (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/21013/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Plaa Entre GD et TGD.Évidemment toujours glissant. Beaucoup d’embacles sérieux(instabilité, glissant, tranchant, etc...)3 MC particulièrement techniques/dangereuses, sans point intermédiaire et avec risque de chute pouvant engendrer une très mauvaise posture pour le leader.1 relais RG très haut placé, d'accès très difficile(glissant++/expo++), au dessus du seuil de la cascade suivante qui debouche sur un énorme bloc siphonnant, a ne pas négliger! Quelques mouvements d'eau au pied des cascades, maîtrise de la trajectoire indispensable.Le canyon, dans son style très particulier, est un savant melange de beaux Enchaînements,/chiant/technique/dangereux....y'a pas d’meaux! ???? (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/21013/observations.html)
