Country: Italia / Italy Region: Veneto Subregion: Verona Town: Pai di Sopra		
Difficulty: not as difficult	Grading: v3 a1 III	Total time: 3h25
Approachtime: 45min	Tourtime: 2h30	Returntime: 10min
Altitude entry: 390m	Altitude exit: 135m	Delta Altitude: 255m
Canyon length: 600m	Highest rappel: 35m	Amount rapells: 25
Transport: on Foot	Rock type:	Drainage area: km ²
Season: January - December	Orientation: West	Best Time:
Rating: ★ 2.8 (5)	Info: ★ 1.7 (3)	Belay: ★ 2.3 (3)
Specialities:		
Gear: Ropes: 2x40m/ 1x20m		
Summary: (machine translated) Dry almost all year round; stale water in pools (stinks!); very slippery; many rappels in mostly small pools; 35m rappel with sharp edge; unfortunately not recommended due to little moving water and silty strong smelling pools; possibly feasible after longer rainy period.		
Hydrology:		
Access: (machine translated) From Torbole towards Malcesine --> continue along the road (249) through the village of Brenzone to the small village of "Pai" (between Torri del Benaco and Castello di Brenzone) --> turn left there towards Pai di Sopra (Via Manzoni) --> drive up to the village over cobblestones --> past the bar and pizzeria --> towards Via Ca. Pai di Sopra (Via Manzoni) --> drive up to the village over cobblestones --> past a bar and pizzeria --> towards Via Ca. Tronconi (dead end) --> after approx. 1.5km there is a bridge --> cross it and park at the 2nd church pillar at approx. 250m (little space for parking).		
Approach: (machine translated) From the parking lot follow the road for 15 minutes in the direction of Ca Tronconi> over a bridge >past the olive trees to the first group of houses --> after the group of houses continue right up to the next group of houses at approx. 380m --> here also right --> follow the path along the stone wall, first straight then slightly uphill to the streambed --> entry at approx. 490m.		
Tour: (machine translated) After a short walking passages the first rappels come, which are usually 10 to 15m high --> after approx. 5/6 rappels comes the highest rappel with approx. 35m (! Sharp edges!) --> the route continues continuously in a narrowing canyon over several rappels, which are often up to 20m high --> small sections can also be climbed using the straddle technique --> however, caution is advised as there are slippery spots everywhere due to the vegetation. Small sections can also be downclimbed using the straddle technique --> however, caution is advised as there are slippery spots everywhere due to the vegetation --> in the last third the canyon becomes even narrower and several rappels follow at short intervals until the end --> after the last rappel it continues over small climbing and walking passages for approx. 50m to the exit of the canyon (stone wall).		
Return: (machine translated) At the stone wall on the right, go up over the olive tree slopes --> shortly you will reach the access path --> down to the parking lot.		
Coordinates: Canyon Start 45.6553 10.7332 Canyon End 45.6573 10.7279 Parking Entry and Exit 45.6536 10.7261 Parking at Exit 45.6572 10.7274

2024-10-13 | Jeroen Kirchner |     |   |   |  Low |  Completed

Done a few days after consistent rainfalls. Enjoyable and rather continuous canyon, with 2 escapes we noticed (one before the final waterfall). Anchors are mostly doubled, renewed, a few older ones, but they do the job. Limited parking space, best to come max 1 car.

2024-07-08 | Marosffy Dániel |    |    |     |  Low |  Completed

One day after a heavy rain the pools were clean and even some water was flowing. We did it without wetsuits that was not too bad. Just a tiny bit.

Automatisch importiert von Descente-Canyon.com für Canyon Sandolino Sceso oggi con scorrimento basso.

All'ingresso c'era scorrimento, cosa non frequente. Era presente schiuma, segno di un ingrossamento d'acqua recente. Armi tutti ok con catene francesi. 4-5 tuffi tutti fattibili. Uno dei migliori avvicinamenti ed uscite dal canyon. Panorama sul lago strepitoso. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2603/observations.html>)

Dopo 5 giorni di intensa pioggia, acqua presente che rallegra la discesa. Sconsiglio la discesa in periodi secchi, alcuni armi ancora vecchi che andrebbero rifatti. Il punto di ingresso su questa descrizione è errato, quello reale è a quota 380 m slm, uscita 140 m slm. Ambiente con bellissimo informalmente con belle calate e sempre continue. <https://youtu.be/KQwTnsNPYLY?si=KB0b6YxZ2xTOY0WM> (machine translated)
