The scenery and location are insane and add a star. The beautiful pools after the source comes in, at this altitude, another star. Second team today, started approach after midday & back by 17:00. As Roland mentions the canyon is re-equipped, but semi-amateuristically (washers placed behind the anchors systematically, mix of metals, cracked rock, a few pictures for reference). Some old hooks are now obsolete, climbers must have come here long time ago. In the lower part a mini via ferrata allows to varry in the descent.

We started the climb at about 2,200 meters. Beautiful and well-equipped rappelling points with a maximum length of 20 meters. After the exposed section, we placed three new anchors in the lower section. A bit slippery but a beautiful alpine route. (machine translated)

Various entry and exit options. Started where there were no anchor points and/or belay stations yet. Used the via ferrata at the bottom. (machine translated)

First canyoning ascent 7 years ago, 2 new stands drilled today, but more could be added.... Beautiful, small, alpine canyon, with mega panorama □. (machine translated)
