Season: January - December	**Orientation:**	**Best Time:**
Rating: ☆ 0 ()	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:

Summary: (machine translated)
Among laurel forests and shrouded in mist many days of the year, is one of the wettest valleys of the island and almost always with flow. Three chained rappels to save this waterfall, not suitable for inexperienced people. Caution with rains

Hydrology:

Access: (machine translated)
Bcos north zone of Gomera
We are located in the northern area, in the surroundings of Hermigua and the Mulagua and Monteforte reservoirs. Between p.k. 14 and 13, as we go from the coast to the interior by the GM-1, we will find a track on the right that takes us to the reservoir of Monteforte, here we can leave the return vehicle or if we only have one.
With the access vehicle we will continue to the junction with the CV14 and we will get into it (El Cedro and Airport), 6kms later approximately we have the detour to El Cedro, we will go down this beautiful road between trees to reach El Cedro where we will park.

Approach: (machine translated)
From the parking lot below, cross to the other side of the dam and take the path that goes up the left side of the river. Rock steps will raise us over the valley to overcome this canyon to the area of El Cedro, time to take the path that gets us into the riverbed.
From the upper parking lot we will take the same path downhill to leave it and get into the river.

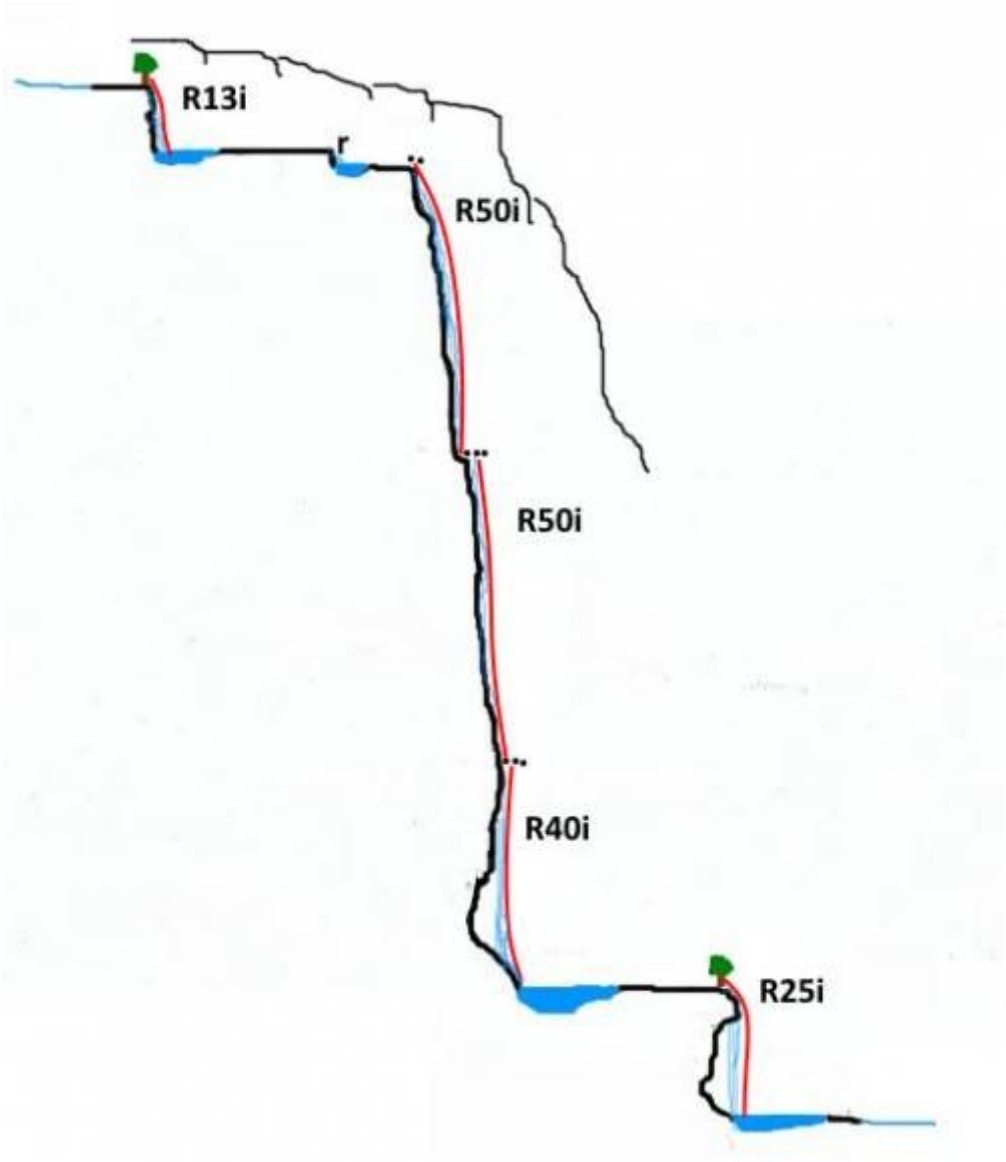

Tour: (machine translated)
See mole, a large vertical of 150m fractionated

Return: (machine translated)
We will exit to the left to take the uphill trail.
