Summary: (machine translated)
Pool hopping and slides with a "run-out" in the form of a longer hiking and swim canyon that can be finished at any time.

Hydrology:

Access: (machine translated)
On the Ghisoni - Ghisonaccia road (D344). 2.2 km after the center of Ghisoni (town hall) we come to the Y-tree on the right of the road - http://mw2.google.com/mw-panoramio/photos/medium/4913016.jpg - and look for a place to park our car.
If we have a second car available, we drive another 5.5 km from the Y-tree and park the second car about 200 m before the bridge at the root of the Sampolo reservoir.

Approach: (machine translated)
Down the path, then straight ahead over the Regalo side stream. Now follow the path along the orographic left bank of the Flius until an easy access route opens up.

Tour: (machine translated)
First there are a few slides and jumps (which can also be repeated), followed by an increasingly tiring river walk in the "Defilé de Strette", which can be ended in many places, at the latest 200m before the bridge at the root of the Sampolo reservoir.
The entire route should only be walked at low water in midsummer.

Return: (machine translated)
On the road either with our second car or One fetches the car by auto stop.
