<b>Summary:</b> (machine translated) A very dry canyon that is best tackled in spring when there is water and ideally when the sun is shining. With its 19 abseils, it is a good warm-up for the coming season. Beautiful views of the plain and pleasant surroundings.		
<b>Hydrology:</b>		
<b>Access:</b> (machine translated) Leave the highway at Sierre Est and take the Montana - Crans road. Drive through Venthône and then continue in the direction of Mollens. The road goes through two hairpins and a large left-hand bend. Continue straight on at this bend for about 500 m, where the road makes a hairpin bend. Leave the "lower car" here.		
<b>Approach:</b> (machine translated) Without car access approx. 30 min  Access to the start: Follow the road to Montana and cross Mollens. At the crossroads on the outskirts of Mollens, turn right towards Aminona. After about 2 km, leave the car on the right in a parking lot, just before a bridge over the canyon. 50 m back, take the small path that leads up to a large path on the right. Follow this path until it crosses the torrent, the starting point of the canyon.		
<b>Tour:</b>		
<b>Return:</b> (machine translated) Path on the right bank of the torrent by the bridge. 50 m further on it meets another path. Walk along the larger path until you reach the Sinièse. Cross this and you are directly at the car.
