Summary: (machine translated)
Collecting canyon, only when Date and the rest of the area are over water, in those days, from Torneiros, we will see the Sobreira waterfall in load and it will be worth the walk. The topo and original description are from EC-DC with two cars, it is also exposed the possibility of making a "jabalinada" to access the waterfall with only one car. For more info see the link to the original descent and contact EC-DC.

Hydrology:

Access: (machine translated)
We have to get to Lobios.
To do this by the OU-540, we turn to the OU-312 and continue to the thermal baths of the river Caldo. We park the return car or if we only have one car.
With the access car we go back to Vilameá and turn off to the Ermita de Nuestra Señora de Xurés, where we park the access car (combination).

Approach: (machine translated)
Two options:
1.- ECDC, car combination, we will leave from the hermitage by the track that goes up the Vilameá river valley until 1000m altitude, at which point a track crosses the river and goes to the pass of Curral do Mouro where we will pass into our valley. Here we will descend to the stream.
Crazy option (wild boar), we leave the thermal baths going up the track of Corgo da Cabreira towards the Hermitage, when the forest begins to open and at first sight we have surpassed the waterfall (there on the right), we will leave the track and in the middle of the slope we will look for the best way to progress, without losing height up to the stream.

Tour:
Ver topo

Return: (machine translated)
We will arrive at the indicated track that goes down to the spa from the hermitage.
