Towards the exit there is a cave with water flow, which has been partially explored. The canyon is located under a south-facing glacier, it has happened that the water flow increased from a few liters per second to more than one cubic meter, it is not easy to find the right water flow. A canyon to do in the morning in the heat. The flow rises sharply from 1pm. At the last abseil, we equipped the right bank to go through a cave. 2 abseils in the cave with a waterfall. Very nice. The exit arrives at the foot of the canyon. Headlamp essential (machine translated)
