Transport:	**Rock type:**	**Drainage area:** km²
Season: January - December	**Orientation:**	**Best Time:**
Rating: ☆ 0 ()	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:

Summary: (machine translated)
Nice initiation canyon, ideal if we catch it after rains, the rest of the time it will be dry and will not be so spectacular. A peculiar access by a small path with a chain in a couple of exposed steps over the ravine.

Hydrology:

Access: (machine translated)
We must be located in Cirat, on the CV20. We will go towards the municipal swimming pools and from here we will follow the track that goes straight ahead towards the Salto de la Novia. About 600m after the swimming pools we will see some warehouses on the left, two curves later we will see a place to park and a path that goes off to the right.
If we get to cross the ravine we have passed

Approach: (machine translated)
We will go along this beautiful path up the ravine for about 1.5 kms through the cut with chains always with the ravine on our left. Just when we see a track approaching on our right we will see a milestone and go down to the ravine.

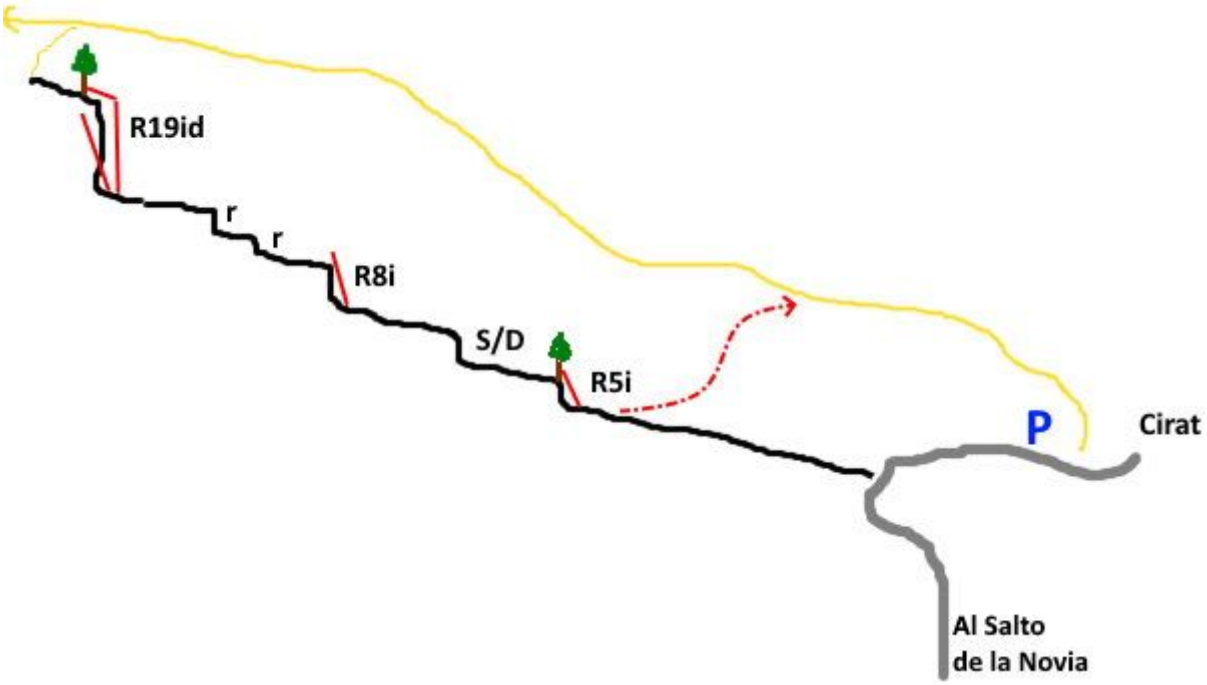

Tour: (machine translated)
Three rappels that gain a lot with water

Return: (machine translated)
After the last rappel we can exit to the left to the access path. If not, we can follow the riverbed to the track but the rest is not of great interest.
