Summary: (machine translated)
Short watery gorge

Hydrology:

Access: (machine translated)
From Nice on the N 202 along the Var River northward for 32 km. Then turn into the Vallée de Tinée, go up the valley on the D 2205 for 50 km until 5.5 km before St Etienne de Tinée or Auron. Turn left here and drive up the D 61 for 7km to Roya and past the village to a parking area overlooked by a decaying wayside shrine. Park the car here.

Approach: (machine translated)
Continue slightly uphill on the dirt road and always stay on it until it turns first into a meadow path at some dilapidated houses, then later into a path. We cross the stream on a bridge. The path goes up a little on the other side and then along the top of the canyon until the descent can be made at a streambed.

Tour: (machine translated)
Short (only 6 rappel), but (apart from the long approach once) worthwhile, also the access in beautiful mountain scenery.

Return: (machine translated)
After the canyon exit, at the first opportunity, go out to the right, along the stream, later cross to the left and then on the access path back to the car.

Automatisch importiert von Descente-Canyon.com für Canyon Corneilles De retour dans Trou aux Corneilles que je n’avais pas descendu depuis une bonne dizaine d’années, toujours aussi sympa même si malheureusement trop court...On l’a couplé avec Guercha (descendu en matinée) ça permet de bien compléter la journée...Équipement ras avons juste changé quelques cordes fatiguées pour une descente en toute sécurité...Ce fut une belle découverte pour la plupart des coéquipiers / coéquipières (CAF de Nice) (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2922/observations.html)
