Transport: on Foot	**Rock type:** limestone	**Drainage area:** km²
Season: April - June	**Orientation:** Southeast	**Best Time:**
Rating: ☆ 0 ()	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:
Ropes: 2x40

Summary:
A short gorge carved into limestone.

Hydrology:

Access:

Approach:

Tour:
The canyoning route is minimally equipped: two rappels require protection on natural anchors, while the other three use double 8mm expansion bolts. A few downclimbs.
Its biggest drawback is that a via ferrata / equipped trail has been created inside, running partway up it and attracting a fair number of visitors in sneakers!
