Automatisch importiert von Descente-Canyon.com für Canyon Pale Very beautiful environment but canyon with various problems:- The fixed ropes are old and unreliable- The last anchorage, passing to the left of the 35 m waterfall, is difficult to reach.- The canyon collects wastewater from the village and the water is opaque and smelly.- After 35, due to the collapse, the descent ends (going out to the left the path is equipped with fixed ropes) and the part in the cave is lost, making the canyon much less interesting.
