Ropes: 2x70m (2x50m/ 1x30m)

Summary: (machine translated)

Open sunny canyon with a view of the sea; 70m rappel subdivisible; after rains or in the spring worthwhile tour; in the summer usually dry; large amount of time required for car transfer; south-facing exposure; sufficient protection (mainly 10mm Inox); escape possibilities almost throughout the canyons; shorty usually sufficient.

Hydrology:

Access: (machine translated)

approx. 30min

Parking exit: From Tivat by ferry in the direction of Herceg Novi to the village of Zelenika. Here pass the port and turn right at Market Primato (gray/red facade). Then continue in the direction of Kuti. Follow the road on the orographic right side of the river. Then turn right over the bridge. Turn left immediately after the bridge. Follow the road (past the small electricity house). Continue to the left over a small bridge and at the monument (with wall rounding). Turn right again. From here follow the road until you reach the last houses. Park at the large meadow next to the gravel road on the right.

Parking entry: Take the second car back to the main road. Here turn right through the tunnel to the big traffic circle in the village of Meljine. At the traffic circle turn right. After 2.5 km turn right towards Sasovići (inconspicuous entrance). Pass the church on the left and follow the narrow mountain road for 5.5 km to a small turnout at about 500m (parking entry).

Approach: (machine translated)

approx. 10min

From the small turnout (parking lot) at about 500m, follow the road downhill for about 40m until a stone wall depression (water shaft) becomes visible on the right side of the road. Here you take an inconspicuous path on the left, past bushes, slightly sloping towards the sea. After an open space (meadow), go left again downhill through light vegetation (small trees) to the stream at about 430m.

Tour: (machine translated)

About 3h

The Sopot is open and mostly dry. Except for the high 70m rappel, there are no major technical difficulties to be expected. After the first two abseils of 10 and 25m, there is a short walking and descending section that leads directly to the high abseil. To get safely to the exposed belay station, it is best to set up a removable rope traverse. If you do not have a 70m rappel, the 70m rappel can also be divided (approx. 25m + 45m). Reaching the intermediate level under the overhang is not so easy (slippery and light pendulum work necessary). After the high step, there are a few more easy smaller rappels interrupted by short walking and downclimb passages. After the last 10m abseil on the right with two pitons, there is a short walking section to a conspicuous large rock on the right (about 60m). Here no longer follow the stream but exit to the left.

Return: (machine translated)

About 10min

At about 60m you get out of the stream on the left and follow the inconspicuous path to the stone wall in front of the house. Along the wall you come to the next house with the asphalt road that leads shortly to the parking lot.
