Country: España / Spain **Region:** Andalucía / Andalusia **Subregion:** Granada **Town:** Otivar		
Difficulty: not as difficult	**Grading:** v3 a2 II	**Total time:** 5h
Approachtime: 20min	**Tourtime:** 4h30	**Returntime:** 10min
Altitude entry: 895m	**Altitude exit:** 350m	**Delta Altitude:** 545m
Canyon length: 6000m	**Highest rapell:** 25m	**Amount rapells:** 15
Transport: Car required	**Rock type:**	**Drainage area:** km²
Season:	**Orientation:** South	**Best Time:**
Rating: ☆ 3.1 (2)	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:
Ropes: 2x30m

Summary: (machine translated)
Open rappel canyon

Hydrology:

Access: (machine translated)
In Almunecar, leave the N 340 and head north on the SO 2 via Jete and Otivar, past the junction of the road to Lenteji to the road bridge (over the Lenteji) in a left-hand bend (14 km from Almunecar). Park the first vehicle here. Continue with the second vehicle up the winding road over the Rio Verde, past an abandoned petrol station at the Mirador de la Cabra Montes and past the signpost on the access road to the Rio Verde. About 450 meters further on (after the traffic signs '40' - 'sharp bends' - 'rockfall'), a dirt road descends to the right. According to Gómez op.cit. there should be a survey pylon 'MP 282' here - perhaps a little further along the road in the direction of Granada - but we did not see it. Park the second car at the junction (approx. 13.5 km from the road bridge, approx. 1000 m above sea level).

Approach: (machine translated)
Descend the slope in an easterly direction down to the streambed (up to here by (4WD car if necessary), where you will soon have to overcome a brick slide brake.

Tour: (machine translated)
After the slide brake, you walk for a long time in the mostly dry river bed and rappel several times until you finally come across flowing water. A little later, the side canyon Palomas joins from the left via a small wall, which - like the Guadajana - can be chosen as an alternative approach (cf. descriptions there).the neighboring canyon to the west is the Rio Verde(-Chorreras) with its headwaters Cortales, Funes and Madronales. Ascent May 2002 integral, exit Oct. 2006 via Guadajana, early Nov. 2009 via Palomas (see description).

Return: (machine translated)
Go down the streambed between the terraces with the fruit trees (do not climb out onto them (in the finca on the right there is a snappy dog and also a snappy farmer) until you can get out directly onto the track that then leads to the bridge and the vehicle below.

Coordinates:
Canyon Start 36.8538 -3.7088
Canyon End 36.8329 -3.6848
Alternative Canyon Start 36.8511 -3.6889
Alternative Canyon Start 36.8501 -3.7159
Parking at Entry 36.8497 -3.7152
Parking at Exit 36.8309 -3.6836

Automatisch importiert von Descente-Canyon.com für Canyon Lentejí Très joli petit canyon très facile. De beaux paysages, belle nature au calme. Avons commencé par l'affluent Guadajana. On a fait du stop pour montrer au village depuis le parking aval. 30 min d'approche. 2h de canyon. 30 min retour. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2542/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Lentejí On a pris une entrée plus classique, un peu au dessus du village de lentegi qui amène directement au départ de l'encaissement. Canyon très bien équipé et très jolie. J'ai préféré à Rio Verde. Merci à Emma du club spéléo local pour la navette fortuite. Sans navette depuis le croisement entre la route principale et lentegi, il y a une route secondaire qui coupe et qui est donné pour une heure à pied. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2542/observations.html)
